

Hello everyone, my name is Nelson Cheng, and I am a Roblox YouTuber and work as a behavior interventionist. I am the youngest candidate running for L.A. mayor to serve and empower L.A.

I graduated from UC Berkeley with two bachelor degrees in 2024. I am running for L.A. mayor because I want to resolve many issues that have been going on across L.A. I am running for L.A. mayor to reduce traffic, crime, and homelessness.

I will also try my best to stop ICE from going after innocent undocumented immigrants, but ICE should go after real criminals, such as murderers, rapists, pedophiles, arsonists, and others instead.

In order to reduce traffic, I will create a new Metro plan that will encourage many Angelinos to use public transportation more rather than driving a car and getting stuck in traffic all day.

I will do that by allowing people to use our subways and then go to buses right after they leave the subways. While they're commuting to work, I will shorten bus wait times from between 20 to 25 minutes to 10 to 15 minutes during weekdays at peak times between 7:00 AM to 9:00 AM and 5:00 PM to 7:00 PM, only around downtown L.A.

From there, I will make bus rides free between those peak times, so as more people use public transportation, there will be fewer people driving a car while going to work. This way, we will be able to see a chance of traffic reduction.

In order to reduce crime, I will help and support our police, firefighters, and emergency services. I know some people want to defund the police, but defunding the police will make crime worse.

If a police officer is found to be guilty, that police officer should be terminated. I know there are good police officers who are helpful when it comes to specific situations.

Finally, in order to reduce homelessness, I will use abandoned warehouses and facilities and convert them into renovated homeless shelters. By renovating them into homeless shelters, we will save millions of dollars, as these buildings are large enough to house hundreds of units in the same space.

If that is not enough, then we will build more housing on vacant land we can find across L.A. Due to mental health conditions, some homeless individuals may refuse housing in desperate situations.

I will have mentally ill homeless individuals sent to mental and behavior treatment centers where they will be diagnosed and treated.

Thank you, everyone.
