Comments for Public Posting: To whom it may concern, We were informed that City Council is considering discontinue cleaning part of our area (North Hollywood, Saticoy near 170 freeway and others) as not to disturb local homeless people and is asking for the neighborhood input. So here is my opinion. I would very much like to keep our neighborhood clean and I think it's wonderful that now it's cleaned regularly, even if it creates some small inconvenience to homeless people. So of course I would like for cleanings to continue and, honest, I am shocked and disappointed by Lorraine Dias email. Don't we deserve some consideration too? As for homeless people: do they not also want to live in cleaner area, if nothing can be done to find them different place? And once again I am totally appalled as it seems some "kind souls" are so concerned about homeless people so they oppose causing even small inconvenience to them and in a meantime the wellbeing of homeowners, people who live in the neighborhood, pay mortgages, take care of their houses and nearby area, work and pay taxes is completely ignored and neglected. If this is not a war to a middle class then I don't know what is. I have a proposition to these "advocates". Why don't they take our local homeless people and put them within a few feet from their own houses? And also they should make sure that they cancel all cleaning in their area as not to disturb them. It's easy to be "kind" at other people expense. Why don't they try to do something really constructive rather than try to ruin other people lives? Thank you very much for your time and consideration. Best, Galina Barskaya and Misha Barsky, 7714 Goodland Ave North Hollywood, CA 91605

Comments for Public Posting: Global Warming concern - If we are serious about reducing emissions I suggest restricting/outlawing use of gas powered lawn blowers. In my neighborhood alone, EVERY house has gardeners who use gas lawn blowers. We're converting auto ownership from internal combustion to electric, let's restrict ALL use of gas blowers. Takes work.
