Comments for Public Posting: Dear City Council, I want to provide an alternative solution to the address change issue. If the council is not able to vote on this issue before the inspection deadlines given by the DCR there should be an option to pay for an inspection at the proposed location pending the approval of the address change. This would allow the phase 2 lic holders to continue their build-outs and move forward in the inspection process and not abandon their licenses. We have worked very hard to meet all of the deadlines and keep up with the forever changing regulations and rules please don't allow this address change to ruin even more cannabis Social Equity Owned business. Please give us an option to request an address change before the June 1 2020 so that we can get into our new locations and be inspection ready by July 3 2020 the deadline .The other option is to push the entire deadline of inspections to give council time to vote, however the council was very clear before the break that this needs to happen and now.
