Comments for Public Posting: I am opposed to the 42 unit small lot project at 2720 N Eastern Avenue. This project will not provide housing that is affordable to El Sereno residents, instead it will cause housing prices to rise further causing further gentrification in my neighborhood. We do not need more luxury housing. This project will increase traffic and bring pollution to my neighborhood. It will take more than 11,000 dump truck trips to remove the hilltop for this project. With climate change we cannot afford to lose more mature trees. Trees in CD 14 are being removed at an alarming rate. Replacing mature trees with young trees will not provide the benefit that these mature trees provide. This type of project will increase the heat island effect in our community. These small lot projects discriminate against the elderly and disabled in that most of the kitchens in these projects are on the second floor. I did not receive notice of the May 2020 hearing or the February 2021 hearing.

Comments for Public Posting: I am opposed to the removal of the black walnut trees on Eastern Avenue. This project will raise housing prices and increase the heat island effect in the community. I did not receive notice of any of the previous hearings.

Comments for Public Posting: Please vote against turning will Rogers state beach into a homeless encampment. My kids will have no where to go have fun. Everything is shut down. There are so few things left for kids to do. It is too scary to have people many of whom are not mentally stable near little kids and you g women. Please don't do this here. We have already voted for so much money toward solving the homeless issue. This is not a solution
