**Comments for Public Posting:** I am a freelancer from italy. I am also a Pakistani but still unfortunately i would say the buyers from pakistan are especially too much shitty that they always tried to get work without paying. I recently work for a Ph.D students for this thesis. The buyer has the australian id but he was from pakistan. We agreed to complete the project in 3 milestones. With the first 2 he check the work and pay me but for the last one he created the dispute and start requesting to refund the previous ones also. The deadline we agreed was 20th may and i submit the work on 17 of may and he never respond to me till 10th of june and when I text him on whatsapp he cancel the contract by saying you have harassed me on whatsapp for paying you and all. This is the worst case till now that i have faced.
