Comments for Public Posting: Why have so many budget and finance committee meetings been canceled? I would like an update on the status of redirecting funds from LAPD. Thanks!

Comments for Public Posting: I am commenting on Meeting ID: 160-535-8466/ Item 46 : Vote no bringing back enforcement zones around city homeless shelters. We are asking for defunding the police not putting more money into criminalizing our houseless. We want investments in health and wellbeing. These "enforcers" steal houseless folks property, things they have a sentimental attachment to, hygiene products, food etc. This is not helping. This is harming. I would like to also speak to Buscaino/Price/Rodriguez. When we said we want a defunding of the police, we did not mean increase funding to community policing. We want LESS police, NOT MORE. We need to reimagine public safety. Giving LAPD more money is not reimagining. This isn't going to work. It hasn't in the past and it never will. These sweeps will also increase the spread of the virus in our houseless community. I know it's not being reported on but many homeless shelters have had outbreaks... Too bad no one cares... But y'all are REALLY going to make it worse but moving houseless folks around and stealing their stuff? Come on! I know it makes these rich folks uncomfortable when they have a visual on how awful y'all are at your jobs and how you fail the people of Los Angeles but you're really going to put lives at risk to mask that? Why don't you just do better instead of sweeping away your incompetence? You need to listen to the people. You need to help the people. You need to be doing better.

Comments for Public Posting: Public Comment In light of the ongoing FBI investigation, arrests and indictments of City Council members, city staff and appointees, it is imperative that no projects which have involved any of these people or any Tain of corruption go forward in any way. The investigation is on going and may spread beyond those people and projects it is now naming and describing as under investigation. Projects must be paused and detailed revue must be done of all votes and processes connected to them. If the City does not exercise the most caution and scrutiny possible in regards projects the city may be placing the tax and fee payers of the city at great danger of liabilities that can be caused in many ways by the taint and actuality of corruption. mishandling and other problems arising from what we have seen of a pattern and practice of undue influence and unscrupulous and questionable dealing. The excessive deference the city "family" culture gives to people who may not be acting in the most scrupulous manner in the execution of city business exacerbates and enables hazardous actions.

Comments for Public Posting: Writing in from CD 14. We need to CANCEL RENT immediately. We need to extend the eviction moratorium indefinitely. We need to seize the hotels right now to house the impending wave of our unhoused population. We need to stop the clean-up sweeps of tents. How can we insensitively and immorally kick people out of housing if we do not have access to employment opportunities or housing options for them. We must CANCEL RENT right now to insure that a major percentage of Los Angeleans become housing unstable and further jeopardizing health and the spread of coronavirus. CANCEL RENT.
