Comments for Public Posting: Ken Shapiro of Silverwood Properties, Gail Ruebeck, and Cheney Shapiro with husband Richard Judson Williams of Resourceful Construction, the contractor, and Longplatt Co, an LLC owned by Richard's employee Joshua Marcuson, with David Lantzman and Lantzman Investment and LMF2LP with REAP inspector Ron Kidwell and Aja Coolay from LADBS are involved in a conspiracy to defraud the City of Los Angeles and its homeowners of many properties in Elysian Heights/Echo Park, and in doing so gain an advantage for the Church of Scientology. With members of the Stonebridge Real Estate firm of Clearwater Fl, they are slowly doing what was done in Clearwater - a take over of the neighborhood by stronghold. In this instance there is securitization fraud and I have material proof, and would provide a sworn affidavit for evidentiary proof of overt acts of fraud such as multi pledging the same loan collateral and unverified deed of trusts, evading property taxes, operating without a broker's license, acquiring secondary contractor's license after the first was revoked, permits illegally issued by misrepresenting who and what, and more to make evident. They have several cases lawsuits filed against them for these same violations and racketeering showing this is a pattern, with a modus operandi to game the system. Please allow a special hearing to serve the people in stopping this massive violation of environmental, real estate, irs, construction, civil, and criminal violations. This is the kind of crime that makes whole communities livid and will cause a uproar if not heard properly by the board of supervisors. Please help me. My wife and I have been threatened with kidnapping and violently assaulted so far and with no help by the police whom have cooperated with this crime, denied us police reports, then lied in their own reports. I have solid evidence of all statements, video, audio, and fact based findings and city document recording, and tax assessors documents as well as sba documents defrauding the city. Silverwood Properties is committing every kind of real estate crime imaginable. Stop Ken Shaprio & Cheney Shaprio and Richard Judson Williams. Were looking for feedback, a response for a private meeting to discuss the matter. We put this in the public file because this is not a matter to be hidden.

Comments for Public Posting: I am writing as a part of a coalition of young professionals in the Los Angeles area to urge the city council to pass a resolution to suspend enforcement of Municipal Code 56.11, thereby ending the inhumane and illegal practice of “sweeps” of homeless encampments. We believe these sweeps are a public health hazard: in addition to people’s belongings and medications being thrown away, the Centers for Disease Control issued guidelines in March that specifically recommended against clearing these encampments, given the potential to disperse the spread of COVID-19 more widely through communities. Weekly “comprehensive cleanups” force elderly and disabled residents to break down their tents and relocate without regard for their health or physical limitations. We are additionally concerned by recently reported trends that unhoused Angelenos are avoiding city cooling centers during extreme heat waves, compounding the effects of environmental racism on this vulnerable community. In addition to the public health implications, we believe that these sweeps are inhumane. Particularly given the ongoing shortage of shelter beds and the daily cost (\$45,000) of these sweeps, we believe it is unjust to subject anyone to this wanton destruction of their property. These cruel and costly sweeps needlessly punish houseless Angelenos who want to access a shelter bed but cannot due to limited capacity. 24 hour LAPD patrols increase the likelihood of unnecessary conflicts and uses of force. The enormous price tag for geographically targeted enforcement is unjustifiable in light of the city’s need for more homeless services and housing. Finally, we believe that the continued enforcement of Municipal Code 56.11 directly violates the injunction granted by US District Court Judge Dale Fischer on April 13, 2020, which mandated suspension of enforcement of sections 56.11(3)(i) and 56.11(10)(d) of the Municipal Code. Judge Fischer also deemed the city in contempt of her order one week ago, on September 23, due to its continued enforcement. For all these reasons, we believe the City Council should pass a resolution suspending the practice of homeless encampment “sweeps,” which are inhumane, illegal, and a hazard to public health.
