Comments for Public Posting: Firstly let us take a moment to recognize the that America is having a major moral delima trying to face the systems that have ensnared our most vulnerable populations. In this very moment as you read this many people of color here in west los angeles are being displaced at all time rates.. They are seeking a reclamation of dignity and sense of self, whole self, a chance to lift ourselves above what has been expected, a chance to be the leaders our hearts demand that we be. Secondly let us contextualize the situation that we are in. The current removal of natives from the most sacred and valuable places left on earth is occurring at all time rates. "Gentrification" that is the sabre which weilds the might of our violent capiistic machine. Supporters of black causes, as myself, of German Jewish Ancestry see and understand how Los Angeles Gentrification is one of the current edges of what i will call " A Blunt Genocide." It's like an amoeba that is engulfing everything of vakue left on earth. The creeping blanket of international capital markets forcing black people out of Venice Beach, a town that their grandparents built. Thirdly I will attest with my degree in Biology this is a historical place that demands to be heard even by the implicit bigotry of our historical penpersonship. The First Baptist Church of Venice is a sacred place founded to heal the community. The idea of a mega mansion replacing it is repulsive. Oakwood and The First Baptist Church of Venice has historical significance, disrupted by tech money and a general overall Gentrification which highlights why we should preserve every but of who built this town and the struggles that they have endured to remain here. With all the worlds money falling all around please do the right thing for your heart and soul. Thank You Victor Noerdlinger RIP: Rest in Power Brandon Glenn His spirit can be felt on stairs of this church his name remains and we never be erased as his smile and beautiful soul.

Comments for Public Posting: I am in support to move forward. My neighborhood has become unsafe for my children. We have encountered numerous situations where me and my children have been in danger or have been exposed to people in our streets doing drugs, exposing themselves or threatening others as well as walking over trash and human feces. How can we ignore our children? This is what our kids are growing up with and it's a disgrace. We are focused on the wrong people and should put our focus on our children.
