Comments for Public Posting: No to Canyon Hills. Los Angeles needs its green space for the health and well being of the residents. More construction, more noise, more traffic, more pollution is the only thing that Canyon Hills will bring to Los Angeles. The transportation infrastructure does not exist to support this project. This will also be detrimental to the ecological aspect of our city. The proposal does not create affordable housing for the community. The watershed from this project will have unintended consequences downstream. And having mini mansions will be a blight on what is an otherwise scenic hillside. Do not allow Canyon Hills to destroy Los Angeles. Just Say No to Canyon Hills.
