**Comments for Public Posting:** Hello, My name is Bree Carson, and I am a student in Aliso Viejo. I am working on a project about homelessness and housing in your city, and I wanted to share my support for rezoning single-family homes within one mile of public transit to allow multiplex housing. This would create more affordable housing, help people who are homeless, and make it easier for residents to use public transit to get to work or school. I hope the Los Angeles City Council will consider this idea and take steps to make housing near transit more affordable for everyone in our community. Thank you for your time!
