Comments for Public Posting: On 24 March, 2021, the L.A. housing dept. committee will meet to discuss harassment of tenants by apt owners. This is a typical hypocritical action on the part of the L.A. city council. I own a six unit apt with a non paying tenant who has previous to the COVID 19 pandemic harassed and caused one of my tenants to leave and another tenant to threaten to leave. They have placed their reasons in writing. I wrote a letter to this tenant prior to COVID-19 informing the tenant that actions against other tenants would not be allowed. I did nothing else, hoping that the tenant would adjust but to no avail. Now, you fools are going after apt operators as if they are the problem. Incidentally,, this tenant has stopped paying any rent. you should stop acting against the investors in our city.

Comments for Public Posting: I am writing to ask for your support for a plan that gets LADWP to 100% clean renewable energy as soon as possible. Climate change is here. We can't afford to delay our transition, and we need to move fast to reduce our dependence on dangerous fuels. This means a plan that expedites our transition and does not allow for coal or methane (natural gas). When I plug in an appliance, I want to know that it is not being powered by burning coal or methane. The work done on the LA100 study proves that this can be done sooner rather than later. Thank you.
