Council File No: 00-9999

Comments for Public Posting: Starlink collection of my biometric data and likeness through wifi tomography and other technologies in violation of CCPA. Please as a city council, demand Starlink open source their technology in compliance with the licences already running inside their infra. As my governmental representatives, you must exercise your oversight capabilities and demand accountability and compliance from Starlink for all of the millions of citizen's whose private data are being harvested for machine learning.
