Council File No: 00-9999

Comments for Public Posting: This is letter serves to bring to your attention that biotechnology tools, including biological agents and bio-responsive materials, may be mishandled by the Los Angeles County Sheriff's Department (LASD). The allegations include: 1. Destruction of Commercial Goods: Contamination or degradation of household products, wash water, clothing, and bedding items, leading to material and financial loss. 2. Contamination of Environments: Improper use resulting in the pollution of wash water areas, posing risks to public health and the environment. 3. Facial Alteration as a Weapon: Use of biological tools to alter individuals' facial features, seemingly for purposes of humiliation, coercion, or control, which is an egregious abuse of power and technology. Such actions, if verified, represent a gross misuse of advanced biotechnological resources and a violation of ethical standards and public trust. Immediate investigation and accountability measures are necessary to prevent further harm and ensure the responsible use of such sensitive technologies.
