Dear Sirs/Madams,

My name is Dr. Eva Yueh. I am from Taiwan, studied for a master's degree at Auburn University, Alabama in 1982. I consider myself a pro-American person because in that era, there was little class distinction in the United States, racial consciousness was increasingly open, and the public was kind and polite. By lending a helping hand to strangers, you can integrate into fair competition in American society after obtaining legal residence status and enjoy a relatively open living and working environment.

40 years have passed, and the United States has changed. Homeless people are everywhere in major cities. People tend to be hostile to Asian faces, especially Chinese immigrants, and even openly insult or beat Chinese people in public. **Where has the confidence, love and politeness of Americans gone?** The infrastructure has not been updated for many years, which has hindered the effective movement of people and materials. When disasters strike, there is a shortage of water and electricity. **Where does the government spend its tax revenue every year?**

The Los Angeles wildfires had been burning for nearly three weeks. The good news is that the wildfires have been brought under preliminary control, thanks to the blessings of rainfall. According to a comprehensive report released on January 17, a total of 6 million residents were seriously threatened by the fire as of January 16. More than 10,000 houses were burned down, a large proportion of which were luxury homes owned by the rich. The municipal authorities have yet to announce when the fire will be completely extinguished. So far, more than 27 people have died and the financial losses are estimated to be more than 300 billion US dollars. It has also exposed the government's dysfunctional governance and the social injustice and unfairness that is controlled by the consortium and can do whatever it wants.

The scene that was reduced to ashes after the fire looked like a home destroyed by war. In Los Angeles in the winter, the victims' lives went from being well-fed and well-clothed to being homeless in an instant. The physical and mental damage they sustained was so severe that it could never be compensated by insurance claims. Apart from expressing our sincere condolences, we in Taiwan have no other way to alleviate the pain and property losses suffered by the residents.

Based on relevant reports from various media and self-media around the world, the Los Angeles fire this time is different from the wildfires that have occurred every summer in recent years in that many of the extraordinary "coincidences" can be explained by meteorological science. For example, wildfires, fueled by drought and foehn winds, became uncontrollable, and sparks were blown everywhere, creating multiple fire areas. The floods in 2023 caused a large amount of vegetation to grow, and the hottest summer and driest rainy season in 2024 caused the wildfires that began at the beginning of 2025. Westerners rarely have the **concept of cause and effect and reincarnation**. They never think that what they do in this life will cause any bad consequences in

this life, let alone the responsibility of revenge in the next life. The corruption of morals, the proliferation of guns, the "zero-dollar shopping" law, and other social phenomena that have become part of the **common karma that everyone bears**, have not been studied or researched from the perspective that the cycle of karma can produce huge consequences in this life. Political discourse serves as a reflection on education and the rectification of public morals and social systems.

The United States is at its peak after World War II, acts as "world police" everywhere to defend so-called "democracy and freedom" values, and to protect the "international rules and order" defined by the United States and its allies. The tycoons and oligarchs on Wall Street who control finance, arms, energy, agriculture, mineral resources, and technology, under the government's operating mechanism, use global resources for their own benefit. The Persian Gulf War that began in August 1990 and the subsequent Iraq War overthrew President Saddam Hussein; followed by the Afghanistan War and the proxy war against Russia in Ukraine, all of which resulted in large numbers of casualties and refugees. What's more, because of United States' "firm support for Israel", Americans ignored the asymmetric bombing and killing of Palestinians in the Gaza Strip, which was close to genocide. The entire Gaza Strip has become a refugee camp with more than 2 million people suffering in hell. Official statistics show that more than 46,000 people have died, and civil groups estimate that more than 64,000 people died. How can we use the slogan of "democracy, freedom and human rights" to justify fanning the flames everywhere, exporting weapons and ammunition, and establishing military bases around the world to support local conflicts in order to achieve the goal of political and economic harvest?

Over the past few decades, the overt military strength has led to militarism, exhausted national treasury resources, caused domestic infrastructure such as transportation, water and electricity, education, production and manufacture to stagnate, but enriched several military-industrial giants. How the U.S. government governs itself from the federal level to the state level is the United States' own internal affairs. Outsiders have no right to comment on it. However, the few examples mentioned above highlight the interference in other countries' internal affairs in the name of "humanitarianism", which has caused political turmoil, economic decline, Refugees are displaced, and even Gaza and eastern Ukraine are scorched earth. Only the victims of the Los Angeles fire might be able to understand the tragedy!

The massacre in Gaza, the lack of humane treatment of Palestinians in the West Bank, and the reckless attacks of countries such as Lebanon and Syria are all carried out by Jews and supported by the unconditional connivance and arms of the United States on the one hand, and Jews also enjoy the full control of the United States' finance and almost all national resources on the other hand. They take whatever they want without any concealment, which can be described as the underworld of capitalism. The biggest beneficiary, the reason for the water shortage for the Los Angeles fire fighting, is just the tip of the iceberg. The consequences of such ideologies, schemes, and actual actions have created countless injustices and hatred around the world and in the United States.

The Eastern thought system of the unity of man and nature, which is mainly based on Chinese culture, emphasizes conforming to the Way of Heaven, obeying the principles of Heaven, and believing in the natural law of cause and effect and reincarnation. As a Chinese living in Taiwan, I would like to use the phrase "the heaven and earth come full circle" to explain the strange behavior of the Los Angeles fire and the huge property losses it caused, and the meaning behind it. It may not be convincing from the purely Western thinking of the United States, but it is a small test that one must succumb to. It is easy for heaven and earth to create climate phenomena such as foehns, tornadoes, droughts, and floods, but humans are exhausted and unable to deal with them at all.

The confidence that American political leaders can command the world ought to come from imposing substantive universal truths rather than the West's own values on others. We should truly promote good neighborliness and live in harmony with each other, rather than engage in hegemonic competition and create conflicts. When President Trump was sworn in today, he stated in his inaugural address that "God saved him from assassination, and gave him the power to save America and make America great again," marking the beginning of another era of American domination. Hopefully, it would not stimulate more hatred, conflicts, and wars.

This time, I personally would like to offer good-intentioned advice to the US government. My purpose is to call on everyone to mourn the victims and affected households of the Los Angeles fire, which has caused the largest fire loss in US history, and enabled the rich and the people to experience the suffering of the refugees devastated

by the war in Gaza and eastern Ukraine. If the US Government can really stop and listen, remember the warnings and lessons from the fire, another disaster that may explode at any time and place might be avoided.

During this extraordinary period, individuals, ethnic groups, and countries all need to actively learn and implement "love and gratitude" and make "kindness" the principle of life and work, so that they can contribute to a stable life, a prosperous country, and world peace.

Appreciate greatly if you could spend some time reading through this letter. Any impression and further perception are formed after reading, and affect your mindset toward "law of cause and effect and incarnation" to a certain extent could be a wonderful outcome, because your thoughts might develop a good diffusion to people around you that might help create a better world.

Sincerely yours,

Dr. Eva Yueh

DARE TO CARE

IF LA COUNTY WERE TO PASS A COMPREHENSIVE
SMOKE REDUCTION ACT
IT WOULD

IMPROVE AIR QUALITY VISIBLY

PRODUCE HEALTHY BREATHING AIR

INCREASE COUNTY REVENUES

REDUCE CLIMATE CHANGE

INCREASE LOCAL RAINFALL

HELP REDUCE WILDFIRE INTENSITY

IMPROVE PUBLIC HEALTH DRAMATICALLY

WILDFIRES

Thousands and hundreds of thousands of LA County residents
Cook outdoors daily with charcoal and wood polluting the air
With massive amounts of toxic smoke particles that affect Climate Change
And Public Health in a very negative way causing the LA County
Basin to repel atmospheric moisture in the form of rain increasing
The combustibility and intensity of wildfires.

Outdoor cooking with charcoal and wood in the LA Basin is beyond doubt
A major source, if not THE biggest source of visible particulate matter in our air.

THIS CRIME MUST STOP

SERIOUS HEALTH RISKS

ALL of the following toxic chemicals are in wood and charcoal briquette smoke. When you smell smoke, you are breathing the following toxic chemicals whether you want to or not. **At least ten of these toxins cause cancer.** The Polycyclic Aromatic Hydrocarbons, PAHs, have been recently shown by the American Academy of Allergy, Asthma & Immunology to **cause epigenetic changes that lead directly to asthma.**

ALL OF THESE CHEMICALS ARE IN ALL WOOD SMOKE

CARBON MONOXIDE, METHANE, VOLATILE ORGANIC COMPOUNDS, FORMALDEHYDE, ACROLEIN, PROPIONALDEHYDE, BUTYRALDEHYDE, ACETALDEHYDE, FURFURAL, SUBSTITUTED FURANS, BENZENE, ALKYL BENZENES, TOLUENE, ACETIC ACID, FORMIC ACID, NITROGEN OXIDES, SULFUR DIOXIDE, METHYL CHLORIDE, NAPHTHALENE, SUBSTITUTED NAPHTHALENES, OXYGENATED MONOAROMATICS, GUAIACOL, PHENOL, SYRINGOL, CATECHOL, PARTICULATE ORGANIC CARBON.

OXYGENATED POLYCYCLIC AROMATIC HYDROCARBONS (PAHs): FLORENE, PHENANTHRENE, ANTHRACENE, METHYL ANTHRACENES, FLUORANTHENE, PYRENE, BENZO(A)ANTHRACENE, CHRYSENE, BENZOFLUORANTHENES, BENZO(E)PYRENE, BENZO(A)PYRENE, PERYLENE, IDENO(1,2,3-cd)PYRENE, BENZ(ghi)PERYLENE, CORONENE.

THIS CRIME MUST STOP

That single fireplace emits more toxic chemicals than a zillion cars

DARE TO CARE

With sixteen people dying every day in LA caused by acute and long term chronic exposure to environmental smoke pollution — Saying nothing about the millions of others suffering from various subclinical lung and Breathing problems — If you tell me that SCAQMD Is doing their best, or or even a good job of providing LA with healthy breathing air — I will tell you that you and I have nothing in common.

SCAQMD

IS ANOTHER WAY TO SPELL

SCAM

LET'S BE HONEST

Would you reach into the toilet and grab hold of a big turd, pull it out and Start munching on it ?? — That is exactly what LA is doing with smoke.

THIS CRIME MUST STOP
