Dear Los Angeles City Council,

The agreement allowing SoCalGas to utilize our public spaces must prioritize our community's interests over corporate ambitions, especially concerning Sempra's LNG export ventures. Oversight confirms these franchises are contingent, with critical financial and environmental impacts.

Given the market volatility and potential infrastructure obsolescence, I encourage you to establish stronger franchise regulations, critically assess SoCalGas' part in Sempra's initiatives, and focus on developing sustainable, union-backed employment that supports our transition to a greener economy.

Thank you for your attention.
