Dear Decision Makers of Los Angeles,

The partnership between Los Angeles and SoCalGas should prioritize the community's interests over corporate agendas. With the city granting access to public spaces, it's crucial that these agreements benefit residents rather than facilitate Sempra's LNG export plans.

Given the volatility in LNG markets, there's a real risk of stranded assets that could financially burden local families. I strongly encourage you to impose rigorous conditions on these franchises, closely monitor SoCalGas' involvement in Sempra's initiatives, and shift focus towards creating sustainable, union-backed employment opportunities that align with our climate goals.

Thank you for considering the future of our community.
