Dear Los Angeles City Officials,

The partnership between Los Angeles and SoCalGas should prioritize the well-being of our community over external corporate interests. This collaboration involves significant responsibilities and opportunities for oversight, ensuring that our public resources benefit residents first.

The fluctuating landscape of LNG markets should prompt a reevaluation of Sempra's expansion plans. We cannot afford to burden our citizens with outdated infrastructure costs. It is crucial to establish rigorous conditions for these franchises, emphasizing transparency and commitment to sustainable, union-supported employment that aligns with our climate goals.

Thank you for considering these important matters.

Sincerely,

Ethan Wearn
