Remote Brain Targeting

EVOLUTION OF MIND CONTROL IN U.S.A.

Mind control, also known as Psychological Electronic or Psychotronic programming, after decades of research, TESTING, and development programs, intensified during the Cold War between the USA and Russia. This resulted in nothing less than brilliant, psychophysical, mind invasive technologies now taking center stage as patented neuroweapons within a mass, social and population control ideation empowered by globalization demanding global subjugation.

This book is a compilation of historic documentation, revealing the role of various agencies including Scientology, gleaned from unclassified documents, the Freedom of Information Act, open literature evidence, official timelines, insiders, and more proving that scientific efforts have been underway for 70 years or more. The agenda, a massive advanced global system, using patented technologies now that can read your mind, subliminally influence and much worse, and, from anywhere on the face of the Earth. The highly advanced, massively connected, Brain Computer Interface (BCI) is now a global system making programming of anyone, men, women and children behavioral modification effortless. The fact is, if you don't control your mind, someone else will!
