To whom it may concern;

Hello, my name is LaTresa Harris. I live at [361 E 62nd St., Los Angeles, CA 90003](#). I am writing this letter In regard to the possibility of getting speed humps placed on my street and to complain about the constant double parking on my block. I've lived at this location since May 1, 2011, and speeding has always been a problem on my street. Now, finally, one of my fears has come true.

On the morning of Oct 6, 2023, at approximately 7:30 a.m., I was pulling out of my driveway to take my 2 children to school. I pulled to the end of the driveway and stopped before entering the street. I looked to my right, and I did not see any oncoming cars. I looked to my left and rolled down the window to look and listen for any oncoming cars. I did not see any cars or hear any cars. I took my foot off the break and proceeded to slowly make the turn into the street. As I turned my head back to the right. There was an impact. The rear driver's side of the other vehicle, swiped the front bumper on the driver side of my vehicle and tore it off. There was a car double parked in the road, and she was trying to go around it, which caused her to be on my side of the road. Had the car not been parked there, and the driver had not been driving fast down the street, the accident would not have happened.

Something has to be done. There are children that play in the street, pedestrians walking across the street, animals that cross the street, and cars turning out of their driveway! But people still fly up and down this street all day long like Jeff Gordon at Daytona 500. What is it going to take to get the city to do something about this? Does someone have to die? I've seen children almost get hit. Pedestrians almost get mowed down and now I've been hit, coming out of my driveway. Thank GOD, my children and I, were not severely or fatally injured! This is not ok. Do I need to sue the city for not protecting it's residents? Something needs to be done now.

Respectfully,

LaTresa Harris
