Dear Mayor, City Council, and City Attorney, Los Angeles, California,

The photo below shows the light pollution emanating from the Los Angeles 6th Street Bridge. The article below describes how the theft of the copper wiring has turned off those lights.

<https://www.entrepreneur.com/business-news/los-angeles-6th-street-bridge-goes-dark-due-to-copper/467618>

Now is the time to eliminate the hypocrisy of asking Angelinos to conserve energy and protect their environment, while simultaneously wasting energy on useless lighting that severely harms human and ecosystem health. It is time to protect the natural night resource, protect human and environmental health, and time to stop light pollution.

Sincerely,

Mark Baker
