PLUM Committee Members,

These are people you are hurting. These people who make up our unhoused community have every right to live just as much as any other existing person. It shouldn't be impossible to exist in this world, and our leaders in positions like yourself should certainly not be perpetuating measures that ensure people can't make a life for themselves. How are they supposed to live without clean water and soap in the water stations? The water station at Beacon has not been restored for 6 months. How are people supposed to live when you let the city shut off water fountains? You only send the showers once/twice a week sometimes to one corner on Beacon and Gulch and that's supposed to be enough? The showers didn't show up for three weeks at one point. How much easier is your life because you get to home to a house with clean water, a bed, a sense of security because you can lock your doors? Do you take it for granted? Your shelters are overcrowded and all plans have not been inclusive of the people's voices who actually make up our unhoused communities. We don't need vacation rentals. We need humanity. Treat people with compassion like a respectable leader should and help our unhoused community have access to basic resources.
