

Dear Los Angeles City Council,

We, the undersigned, demand the Los Angeles City Council, Mayor Eric Garcetti, City Attorney Mike Feuer and the entire LA city government to:

- Move to enact as quickly as possible a 2500-human health and safety buffer ordinance that would phase out oil and gas production to homes and schools within five miles.
- Pursue a workforce development and economic revitalization program that benefits impacted workers, closes up political money and sets LA on a course toward a family-supporting, health-promoting ecologically sustainable economy of tomorrow.

Sincerely,
Macy Gustafson
