

Hello,

We, the undersigned, demand that Los Angeles City Council, Mayor Eric Garcetti, City Attorney Mike Feuer, and the entire LA city government to:

- 1) Move to enact as quickly as possible a 2500 human health and safety buffer ordinance that would phase out oil and gas production to homes and schools within five years, and
- 2) Pursue a workforce development and economic revitalization program that benefits impacted workers, cleans up polluted neighborhoods, and sets LA on a course toward a family-supporting, health-promoting, ecologically sustainable economy of ~~the~~ tomorrow.

Black Lives Matter.

Regards,
