Honorable Wendy Greuel, Chair
Transportation Committee
Los Angeles City Council
200 N. Spring Street, Room 475
Los Angeles, CA 90012

Dear Councilmember Rosendahl, Councilmember Greuel and Honorable Members:

**COUNCIL FILE NO. 07-2474 – STATUS OF BRIDGES AND TUNNELS IN THE CITY
OF LOS ANGELES**

I am hereby submitting a status report in response to a request by the joint committee meeting of Public Works and Transportation on September 19, 2007. The joint committee requested that the Bureau of Engineering (BOE) report on the "Status of Los Angeles Bridges and Tunnels" and the programs that exist to repair, retrofit and maintain them.

INTRODUCTION

This report covers the bridges and tunnels that the City owns, or that the City inspects and maintains, or that the City has the responsibility for notifying other owners of the condition of the structures. This report does not address the condition of the bridges and tunnels that are maintained by Caltrans on the State Highway System.

**OCT 03 2007
PUBLIC WORKS**

TRANSPORTATION

All bridges are inspected in accordance with the American Association of State Highway and Transportation Officials (AASHTO) standards, that is adopted by the Federal Highway Administration (FHWA).

Recently, there have been discussions on the "Structurally Deficient" rating of a bridge and what that indicates. It is important to note the meaning of the term "Structurally Deficient" as it applies in the reporting system. It is not construed to mean that these bridges are in danger of collapsing. "Structurally Deficient" means the bridge needs repairs and has a low rating of 4 or less (on the scale of 0 to 9, 9 being the best) for either the deck, superstructure or substructure; or 2 or less for overall appraisal and water adequacy. Most of the bridges listed as "Structurally Deficient" in the City of Los Angeles are in need of repair to portions of their deck, but are not in danger of collapsing.

INSPECTION

There are 602 bridges and tunnels within the City of Los Angeles that are inspected in a two year cycle (Appendix A). Of the 602 bridges and tunnels, there are 567 bridges and 35 tunnels.

The Bureau of Engineering has the responsibility for inspecting 147 bridges and 28 tunnels. Caltrans inspects 420 bridges and 7 tunnels for the City of Los Angeles. These bridges and tunnels are listed by Council District in Appendix B. All inspections are carried out by licensed professional civil engineers. Inspection of bridges is in accordance with the American Association of State Highway and Transportation Officials (AASHTO) standards.

Caltrans provides inspection for the City's bridges and tunnels that are listed on the National Bridge Inventory listing (State bridge numbers beginning with 53CXXXX). These bridges are at least 20 feet in span length and are on strategically important routes (Strategic Highway Corridor Network – STRAHNET).

Inspection data for each bridge and tunnel is then entered into the BOE database for producing reports and work recommendations.

STATUS

Caltrans has identified 17 City bridges that are "Structurally Deficient" (Appendix C). Out of the 17 City bridges listed as "Structurally Deficient", one bridge (City # 000823) is in the Bid and Award phase through the BOE's Bridge Improvement Program (BIP) and is scheduled for construction in April 2008. Two bridges (City #'s 000526 and 000643) are in the final design phase and are scheduled to be in construction by April 2008 and November 2009, respectively. Two bridges (City #'s 000508 and 000579) have been recommended to the Bureau of Street Services (BOSS) for minor repairs. The repairs

on one bridge have been completed (City #000579), and the other (City #000508) is scheduled to be completed by the end of 2007. Two bridges (City #'s 000563 and 000853) are in a Pre-design phase, and on a priority list for upgrade and seismic strengthening, but are on-hold due to the lack of funds. BOE is in the process of designing details for BOSS and the Bureau of Street Lighting (BSL) to do the maintenance on four bridges (City #'s 000611, 000589, 000858 and 001001) to be completed within 30 days. BOE will schedule an additional field investigation with Caltrans and evaluate the deck for four other bridges (City #'s 000949, 001166, 001391 and 001433) within 90 days. After the field investigation, recommendations can be made for the protection of the decks. Caltrans at this time has not recommended any work for two bridges (City #'s 000645 and 001409) that are rated "Structurally Deficient".

115 vehicular bridges are identified by Caltrans or the City as functionally obsolete. These bridges are identified as having a low rating for either the deck geometry, under clearances, approach width, or traffic carrying capacity. Of these 115, 51 are part of the active projects on the Bridge Improvement Program in BOE.

REPAIRS

BOSS and the BSL provide minor and routine maintenance for items not exceeding \$25,000 per bridge. Repairs to bridges that are greater than \$25,000 are referred to BOE's Street Improvement Program for inclusion in the Capital Improvement Program (CIP).

REHABILITATION AND SEISMIC STRENGTHENING

The BOE's Bridge Improvement Program (BIP) is very active in planning, prioritizing and programming projects for the City-owned bridges. From 1975-1985, 22 bridge upgrades were completed for a total cost of \$3.8 million. These projects involved structural upgrades related to seismic strengthening. Funding was provided through the City's Gas Tax annual allocation.

After the Loma Prieta earthquake of 1989, the City passed the Seismic Bond measure (Proposition G). From 1990-2002, 117 bridge upgrades for seismic strengthening were completed for a total cost of \$117 million. During this period, 6 additional bridges were upgraded geometrically to improve traffic flow. These 6 projects had an average cost of \$3 million per bridge.

Approximately 80% to 88% of the funding for the BIP comes from the Federal Highway Bridge Program (HBP). On the most critical seismic projects, the State's LSSRP (Local Seismic Safety Retrofit Program) program provides up to a 12% matching fund. However, LSSRP funds were cut in 2003 when the State experienced a major budget deficit. At that time, 24 less critical projects were placed on hold at the direction of the

Public Works and Transportation Committees Council File No. 07-2474 - Status of Bridges and Tunnels in the City of Los Angeles

Page 4 of 5

City's Seismic Governance Committee to allow funding for priority seismic projects. These are still not funded. From 2003-2007, the Seismic Bond provided much of the needed local match to continue with all seismic upgrade projects. Today, there are 13 remaining seismic retrofit projects in the design phase. The recent passage of the State's Infrastructure Bond may restore the original State matching funds, but it is on a "first come-first serve" basis and there are over 500 projects of this type across the State.

From 2002 to present, the BIP includes 83 projects that have been identified for seismic strengthening and upgrading. To date, 12 of the 83 BIP projects have been completed. These 83 projects generally have substandard geometry creating bottlenecks, and moderate structural deficiencies. The following is a summary of the current status of BIP:

- 12 projects have already been completed.
- 13 projects are in construction (\$47 million).
- 34 projects are in various stages of design.
- 24 projects are on hold.

The status of funding is as follows:

- Approximately \$850 million is needed to complete the remaining 71 projects. BIP has thus far identified \$600 million in FHWA and available local matching funds.
- New funding of \$250 million is needed for the 24 on hold projects. Of the \$250 million, \$26 million is needed for a local match with the remaining funds from FHWA.
- If all 71 projects are funded, it will bring 80% of the City's bridges and tunnels to a sufficiency rating of at least 80 or better by the year 2013.

Sixth Street Viaduct over LA River:

The Sixth Street Viaduct was built in 1932, and it crosses the Los Angeles River, Union Pacific Railroad tracks, Metrolink tracks, and the US 101 Freeway. It is one of the oldest structures in the State's inventory and spans more than 3,500 feet. It is one of the largest bridges on the Proposition 1B Seismic Match list.

The Sixth Street Bridge is one of the most vulnerable City-owned bridge. It is listed on Caltrans' mandatory seismic retrofit list, and the analysis performed indicates that this bridge has a 70% probability of failure for a design level earthquake within the next 50 years. This bridge also has a very low sufficiency rating of 52.4 points out of the maximum 100. More importantly, the Sixth Street Viaduct is suffering from a condition known as Alkali Silica Reactivity (ASR) which is essentially a concrete "decay" that over time weakens concrete's strength. Alkali reactants from the aggregates react with silica,

October 2, 2007

Public Works and Transportation Committees Council File No. 07-2474 - Status of Bridges and Tunnels in the City of Los Angeles

Page 5 of 5

and in the presence of moisture, forms a gel-like substance that cracks the concrete structure internally. This phenomena, of course, was not known at the time of construction. Laboratory testing indicates that deterioration due to ASR will continue, and that the structure's vulnerability to collapse in a seismic event is exacerbated.

The current estimated cost to replace the entire structure is about \$200 million. Proposition 1B funding is programmed for this project, but is not guaranteed.

If you have any questions regarding this report, please contact John Koo or Sunny Patel of my staff at (213) 202-5591 or (213) 485-5445, respectively.

Sincerely,

Gary Lee Moore, P.E.
City Engineer

CITY OF LOS ANGELES
STRUCTURALLY DEFICIENT BRIDGES (TOTAL 17)

CITY NO	STATE NO (CALTRANS)	CITY BRIDGE TITLE	COUNCIL DISTRICT	BRIDGE TITLE (CALTRANS)	LOCATION (CALTRANS)	STRUCTURAL CONDITION SD (CALTRANS)	SUFFICIENCY RATING (CALTRANS)	WORK RECOMMENDED (CALTRANS)	WORK RECOMMENDATION NOTES (CALTRANS)	CITY INSPECTION AND COMMENTS
000823	53C1388	WINNETKA AVE BRIDGE O/LOS ANGELES RIVER, BET ARCHWOOD ST AND GILMORE ST	3	LOS ANGELES RIVER	0.25 M S/O VANOWEN ST	SD	69.4	31 - Joints-Rehab	Fix and level the steel plate at joint #2 that is popping up 25 mm at the westerly side. Replace the 3.0 m that was hit at the north of the westerly barrier.	BiP Project is in the Bid & Award phase. Construction will commence in the next dry river season of April 2008. Repair request to BSS is in progress.
000526	53C1106	BRADLEY AVE BRIDGE O/PACOMA WASH, BET DEL SUR ST AND ARROYO AVE (CITY OF SAN FERNANDO)	7	PACOMA WASH	0.4 MI NORTH FWY 118	SD	63.6	02 - Deck-Repair Potholes	Patch all the potholes and seal the wide cracks with asphalt material.	BiP project is in final design phase and scheduled for construction in April of 2008. AC repair request to BSS is in progress.
000643	53C0160	RIVERSIDE DR VIADUCT O/LOS ANGELES RIVER AND SPRR	1	LA RIVER, SPRR, AVE 19	100' W/O SAN FERNANDO RD	SD	63	02 - Deck-Repair Potholes	Repair the large A/C pothole at 15 m from the west of the WB lane. Repair the spill in the southerly girder at span #8. Remove the piece of concrete that is a hazard it can fall any time on a car passing by under this piece of concrete. As I was inspecting this bridge I called the city engineer to send his crew and remove this hazard. Retrofit the Waboblex joint at the westerly end. Level the bump at the northerly sidewalk. Bent #4.	BOE responded immediately to remove the hazard. BiP Project is in final design phase. Bridge is scheduled for replacement with construction start in late 2009. AC Repair request to BSS is in progress.
000508	53C0067	ANAHEIM ST BRIDGE O/RR (ABAND), 100 FT E/O GAFFEY ST	15	ANAHEIM STREET OH	0.1 MI E/O GAFFEY ST	SD	86.6	25 - Sub-Scour Mitigate	Backfill the undermining at the existing top portion of the concrete slope protection which occurs in several locations especially at the south end.	Recommendations to repair issued to BSS on 06/11/07 and repairs will be completed by end of December 2007. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
000579	53C1213	INGLEWOOD BLVD BRIDGE O/BALLONA CREEK, BET CULVER DR N RDWY AND CULVER DR S RDWY	11	BALLONA CREEK	BTW CULVER DR & MCNDLD ST	SD	91.3	91 - Paint-Spot Prep/Paint	Clean and paint the rusted girders. Patch ad repair the fractured channel slopes at span #2 which has rocks separated at the middle of pier wall #2 approx. 3.0m X 1.5m. Fix the joints above the abutments those were partially failed. Especially the steel plate at the north joint at the easterly end which has the steel plate is loose.	Repair request for joints and steel plate were done in 07/05/07 and repairs were completed on 8/13/2007. Rust removal and painting girders repair request to BSS is in progress. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
000563	53C0044	4TH ST VIADUCT O/LOS ANGELES RIVER, BTWN MISSION RD AND SANTA FE AVE	9	4TH ST VIADUCT (SANTA FE AVE)	BETN MISSION RD & SNTA FE	SD	66.9	09 - Deck-Misc.	Patch the south sidewalk at west end that has several spalls with rebar exposed and rusted. Patch all the spalls at the box girders at span #9 to span #17. Cut the trees those are hanging at the south and the north sides; and use a high water pressure to remove all organics.	One of BiP's on-hold bridges (scope is to replace barrier rails) due to lack of match funding. BOE is in process of designing details. AC and epoxy repair request to BSS is in progress.
000853	53C0125	4TH ST VIADUCT O/LOWER ST AND FIGUEROA ST, BET HOPE ST AND HARBOR FWY	9	4TH ST VIADUCT (FLOWER ST)	BETWEEN HOPE ST & FWY110	SD	66.9	01 - Deck-Patch spalls	Patch all the numerous of spalls with rebar exposed and rusted throughout the deck. Replace the missing electric cover (1 X 2) ft at the north sidewalk between the two hinges of span #6. Repair the several unsound spalls of the southerly face of the box girder at lane #5, #1 and the westerly sidewalk. Fix and weld the open joint of hinge #6 that has the welding of the metal plate failed at EB lane #1. Repair and patch the the pourable joint at hinge #3 that 600 mm X 100 mm X 50 mm at EB lane #4 (south lane) with rebar exposed and rusted. Clean the pourable joint at hinge #3 that was full of dirt. Patch with epoxy the approach slab #4 at the west end that has a spall (600 mm X 300 mm X 100 mm). Paint both metal rails. Patch with epoxy the approach slab #4 at the west end that has a spall (600 mm X 300 mm X 100 mm). Paint both metal rails.	BOE is in process of designing details and AC repair request to BSS is in progress. One of BiP's on-hold bridges (scope is to replace barrier rails) due to lack of matching fund.
000511	53C1118	CANTARA ST BRIDGE O/TUJUNGA WASH, BET NAGLE AVE AND VARNA AVE	6	TUJUNGA WASH	BTW NAGLE AVE/VARNA AVE	SD	72.4	03 - Deck-Rehab	Repair the AC overlay cracks and spalls on the deck surface and the approachs.	Design details for AC repair request to BSS is in progress. This is not currently a BiP project since BSS maintenance work may resolve deficiencies.
000589	53C1234	LAUREL CANYON BLVD O/LOS ANGELES RIVER AT VALLEYHEART DR	2	LOS ANGELES RIVER	0.2 MI N/O VENTURA BLVD	SD	88.6	04 - Deck-Resurface	Repair the AC overlay cracks and spalls.	Design details for AC Repair request to BSS is in progress. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
000858	53C0473	WHITE OAK AVE BRIDGE O/LOS ANGELES RIVER, BET VICTORY BLVD AND ERWIN ST	12	LOS ANGELES RIVER	1.0 MI NORTH OF U.S. 101	SD	84.7	92 - Paint-Spot Prep/Full Pnt	Sand blast the rusting girders and paint them. Level the 20 mm sidewalk depression at the northeast corner and the 20 mm sidewalk depression at the southeast corner.	Design details AC repair request to BSS is in progress. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
001001	53C0132	FAIRFAX AVE BRIDGE O/BALLONA CREEK, BET VENICE BLVD AND SANTA MONICA FWY	10	BALLONA CREEK	0.13 MI S/O VENICE BLVD	SD	87.8	09 - Deck-Misc.	Level the 15 mm depression at NW corner.	Design Details for AC repair request to BSS is in progress. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
000949	53C1287	PLATT AVE BRIDGE O/BELL CREEK, BET VICTORY BLVD AND SYLVAN ST	3	BELL CREEK (S FORK)	0.1 M SOUTH VICTORY BLVD	SD	91.9	06 - Deck-Methacrylate	Clean and seal the severe cracks of the concrete deck by coating the bridge deck with methacrylate.	Further field investigation is to be scheduled in 90 to 180 days together with Caltrans staff and LADOT. Deck repair request to BSS is in progress. Stage I, deck cracking doesn't appear significant. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
001166	53C1334	TAMPA AVE BRIDGE O/LIMEKILN CHANNEL, BET NORDHOFF ST AND SPRR	12	LIMEKILN CHANNEL	0.25 M S/O NORDHOFF ST	SD	67.9	06 - Deck-Methacrylate	The heavy cracking of the concrete deck requires the cleaning and sealing with methacrylate. Before performing this work, it is recommended to check the deck (chaining) for potential delaminations below the deck surface. The chaining should be done by closing one bound of traffic alternately. The City should contact the ABME for scheduling the chaining.	Further field investigation is to be scheduled in 90 to 180 days together with Caltrans staff and LADOT. Deck repair request to BSS is in progress. This is not currently a BiP project since BSS maintenance work may resolve deficiencies.
001391	53C1822	DEVONSHIRE ST BRIDGE O/BULL CREEK, W/O WOODLEY AVE	12	BULL CANYON CREEK	0.2 MI W WOODLEY AVE	SD	91.1	06 - Deck-Methacrylate	Clean and seal the concrete deck cracks by coating the bridge deck with methacrylate. Patch the 2 spalls 150 mm X 100 mm X 30 mm at WB lane #1 approx. 4.0 m from the west end.	Further field investigation is to be scheduled in 90 to 180 days together with Caltrans staff and LADOT. Deck repair request to BSS is in progress. Not a BiP project since SR is above 80 and not eligible for federal HBP grant funding.
001433	53C1885	BALBOA BLVD O/SAN FERNANDO ROAD AND RR	12	BALBOA BLVD SOH	AT SAN FERNANDO RD	SD	76.1	06 - Deck-Methacrylate	The heavy cracking of the concrete deck requires the cleaning and sealing with methacrylate. Before performing this work, it is recommended to check the deck (chaining) for potential delaminations below the deck surface. The chaining should be done by closing one lane of traffic alternately. The City should contact the ABME for scheduling the chaining.	Further field investigation is to be scheduled in 90 to 180 days together with Caltrans staff and LADOT. Deck repair request to BSS is in progress. Stage I, deck cracking doesn't appear significant. This is not currently a BiP project since BSS maintenance work may resolve deficiencies.
001409	53C1879	MARMION WAY BRIDGE O/ARROYO SECO CHANNEL	14	ARROYO SECO CHANNEL	AT I-110	SD	77	None	None requested.	Deck has map cracking in Stage 2 condition. Details for deck repair request to BSS is in progress. This is not currently a BiP project since BSS maintenance work may resolve deficiencies.
000645	53C1214	JEFFERSON BLVD BRIDGE O/CENTINELA CREEK, E/O MESMER AVE	11	CENTINELA CREEK	0.2 MI N OF I-405	SD	62.3	None	None requested.	Appears that structure is in fair to good condition. Epoxy repair to BSS is in progress for soffit cracks.
