Sharon, to follow up on yesterday's Public Safety meeting - Item 2 - CF -09-1977-S2, would appreciate you distributing this to the Committee. This is why this motion and the results are so important to our firefighters, property owners and the entire City of Los Angeles. This type of fire today would be even MORE catastrophic so this brings this matter is URGENT as fire is not a respecter of wealth, location or most importantly lives which is what the Public Safety Committee is all about.

Thank you, Sharon for all your help with this
