Dear Representatives;

With great concern for this ordinance: (The Planning and Land Use Management (PLUM) Regarding the restriction on shared housing; please with thought and vision for our immediate future. This proposal to implement this new ordinance to shut down shared housing would further create more homeless people; including, families with children. As we are facing many tough cuts with state, city and county-wide here in California, we can not afford to eliminate fair housing for all parties concerned. I have been involved with the 10-year homelessness committee and worked as the housing liaison with my department as I am passionate about permanent housing for everyone. If you decide to eliminate shared housing in our communities, neighborhoods....we will have more homeless population than we do now. We are faced with epidemic proportions of displaced, home less human beings as like never before. More children are growing up today because of the lack of affordability, no hope for stable permanent housing because let's get honest. We have not as Americans taken care of priorities! Now we face the influx of numbers and countless homeless human beings that have no real hope of stability because of poverty, not enough housing to accommodate and all at the expense of those in need most! Lets fix our problems.....not ...create more apathy and hardship. We must do better to live better and with all people!

Thank you,

Gail Tapp, (310) 519-6225
