To: Members of the Public Works Committee, City of Los Angeles
Re: Council File 11-1246-S1

Dear Members of the City Council,

I am writing to provide comments on the Bike/Ped/Equestrian Atwater Bridge project being heard in committee today. My comments are in reference to Council File 11-1246-S1.

I am a project manager at the UCLA Luskin Center for Innovation and one of the authors on the Luskin Center's report, titled "Creating a Complete Los Angeles River Greenway for All: Stories and Guidance."

In our report, we focus on the Los Angeles River greenway. The LA River and its greenway are now center stage in discussions of open space and recreation, active transportation, regional watershed management, ecosystem restoration, climate resilience, and public art transforming the Los Angeles region. The City of Los Angeles has led much of the revitalization effort and the work has been exciting and transformative. In particular, a complete Los Angeles River greenway has the potential to provide numerous social, health, transportation, and environmental benefits for the region. A complete LA River greenway as an active transportation, open space, and recreational corridor involves a network along both sides of the 51-mile river of: community access points; parks and other green spaces; pedestrian, bike, and equestrian paths; and bridges for non-motorized use. A complete LA River greenway provides parks and trails for exercise, bike paths for commuting, bridges for connecting communities, and places to stop, meet friends, or observe wildlife.

Bridges, like the one proposed today, are a critical component of a complete greenway. They offer many benefits, including:

- **Mobility and Safety:** Footbridges can create a continuous, uninterrupted, and secure active transportation network along the LA River greenway. They also link adjacent neighborhoods and broader communities that have been historically disconnected.
- **Accessibility to Economic and Social Centers:** Bridges provide community members with access to important destinations such as transit stations, schools, parks, employment centers, and shopping districts.
- **Aesthetics:** By including artistic elements in construction designs, bridges can enhance user experience by improving the aesthetics of the LA River greenway or even become a destination in and of themselves. Design and artistic elements can be created by local community members strengthening community identity and pride.
- **Health:** Many LA River-adjacent communities are heavily burdened with environmental hazards, and thus have much to gain from the physical and mental health benefits of safe and continuous river pathways, which include increased physical activity, active commuting, contact with nature, and community connectedness.

Pedestrian bridges over the LA River are few in number (relative to the number of bridges for cars and trucks), and often were built with a focus on utility, not aesthetics. Without bridges, there is a severe lack of connectivity, diminishing the value of other greenway elements like parks and pathways. Without bridges, the river is a barrier to community connectivity and accessibility.

Most of the 80 bridges over the LA River were designed for vehicles, not pedestrian, cyclists, and equestrians. The pedestrian crossings that do exist, are decades old and are intended to be purely utilitarian pieces of infrastructure, evident through their structure and materials used.

Bridge projects are typically very costly and it can be difficult for project proponents to secure funding. The proposed bridge has most of its funding already secured which is usually a big hurdle to overcome. Additionally, the bridge is not only a crossing for multiple types of users (who were identified through project development), but also meant to be a gathering place, creating multiple benefits for adjacent communities.

For more information on the development of this bridge and the importance of bridges generally, see the Luskin Center's LA River Greenway Guide (the proposed bridge is featured and called "La Kretz Crossing": www.innovation.ucla.edu/greenwayguide)

Sincerely,

A handwritten signature in black ink, appearing to read "Kelsey Jessup". The signature is fluid and cursive, with a large loop at the end.

Councilmember Joe Buscaino, Chair, Public Works and Gang Reduction Committee (Attn: John White)

Councilmember Mike Bonin, Chair Transportation Committee (Attn: Adam Lid)

Councilmember Mitch O'Farrell, Council District #13,

As the Director of Government & Public Affairs for the Los Angeles chapter of The American Institute of Architects, I **am writing to share my strong SUPPORT for the proposed LA River North Atwater Multimodal Bridge and I advocate for the cable-stay bridge design as recommended by River LA.**

It is vital to fund this important connection across the Los Angeles River and it is equally vital that the design of this bridge serves to represent the stature and the dignity of what the Los Angeles River means to all Angelenos and a symbolic narrative uniting us more closely together.

Therefore I recommend that you allocate from the Public Works Trust Fund the \$6,933,133 necessary to build the cable-stay bridge as soon as possible.

The cable-stay bridge design responds to every goal and requirement that was presented throughout the community outreach and engagement process:

- Mixed-modal: It safely accommodates pedestrians, equestrians and bicyclists.
- The bridge is future proof and flexible to accommodate uses that have yet to be identified.
- The structure addresses sometimes contradictory multi-agency requirements.
- The design solves the very real concerns about river safety by creating as minimal an impact on the river as possible. In this case, placing a robust structure above the deck, out of harm's way instead of in the channel.
- The design responds to the unique needs of this community and the specific condition of this location. No simple or off the shelf solution exists.

I thank you for your leadership on this issue and on your strong commitment to make sure that Los Angeles remains a healthy and vibrant place to live, work and play.

Very truly yours,

Will Wright, Hon. AIA/LA

LA RIVER.docx

DATE: May 21, 2017

TO: adam.lid@lacity.org
john.white@lacity.org
eric.villanueva@lacity.org

FROM: Sheila Irani
Former Director, Special Projects CD4, Councilman LaBonge

REFERENCE: Council File 11-1246-S1

To Whom It May Concern:

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians, and bicyclists.

The Los Angeles River bike path is a regional destination, however, it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. Working for Councilman LaBonge, I worked with the communities affected by the lack of connectivity they experienced and the LARRC (now LA RIVER) in creating a solid solution that would have long lasting impact and serve as a memorable landmark. Councilman LaBonge decided to fund the EIR along with then Councilmember Garcetti from CD13 with their respective discretionary funds in the hope of seeing this vision be constructed.

The importance for the equestrian community to avoid going into the River to cross into Griffith Park as well as cyclists and pedestrians to join the LA RIVER bike/ped path or enter Griffith Park has been noted by community leaders from all these groups, and the decision to invest discretionary funds from two council offices to begin the process of building this bridge was made with an eye to the future when the LA RIVER will be the vital open space and recreation area it should be. The design was to be memorable but practical in that it allows for both equestrians and cyclists to cross safely.

After all these years, I am happy to see it is in the final leg of approval, and I do hope that the Councilmembers will support this vision for the River and the constituents of this City who want to escape our reliance on the automobile, exercise and enjoy the LA River and Griffith Park. I think it will become a centerpiece from which more infrastructure will be developed to promote and increase the value of these areas for the benefit of all.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at 323-793-7868.

Sincerely,

Sheila Irani

Subject: Council File 11-1246-S1 - Atwater Village Bridge

To: adam.lid@lacity.org, john.white@lacity.org, eric.villanueva@lacity.org

Dear Sirs,

I live, work and play on the Los Angeles River. I feel fortunate to live in Atwater Village and would like to voice my support of a multi modal bridge linking North Atwater to Griffith Park. As a 10 year resident in North Atwater Village, I see great value in creating additional access along and across the LA River. As traffic increases in the City, the bridge represents an opportunity for alternative transportation modes to be used to commute in and around Los Angeles linking existing biking infrastructure, horse trails and a future East Bank Riverway pedestrian path now in the planning stages.

Furthermore, the symbolic nature of the bridge at the Glendale Narrows Portion - the 11 miles of various wildlife and greenery will enhance the preservation of the river ecosystems by keeping horses and people up and away from disturbing the fragile ecosystems in the area, since now horses and people traverse the water to make the same connection.

With the US Army Corp barriers hindering access to the River, specifically at North Atwater Park where a monument from President Barack Obama commemorates the river as one of America's great waterways and even expresses the goal of "more unobstructed access" to the River, this bridge will bring more accessibility, more use of North Atwater Park, more stitching of communities together, and expanding the emerald green belt of parks and open space envisioned by the Olmsted-Bartholomew Plan for the Los Angeles Region which layed out a goal of traversing Los Angeles not by car, but by foot.

Lastly, there is an ongoing battle in Los Angeles to define and capture urban space -- with calls for more density and others championing preservation. This bridge will literally create a new urban space, and will be useful for redevelopment of North Atwater City Yards, but also creating more access for residents to the expansive Griffith Park and all its amenities. Furthermore, the bridge itself accesses heretofore unusable open space - above the LA River.

I therefore would like to urge Public Works Committee to provide the \$6.9 million in funds to allow this project to begin in June 2017.

I would also like to see a frugal management of construction funds by the BOE.

I hope that more bridges will be constructed as small scale access ways like Sunnynook Bridge and other existing bridges be rehabilitated and repaired rather than be demolished in order to attain federal highway funds for new, bland car-oriented bridges.

Thank you,

Damian Robledo

RE: Council File 11-1246-S1

Dear Esteemed Members of the Council Committee,

I would like to express my support for the North Atwater Bicycle and Pedestrian Bridge. I am a cyclist and I ride through this area of the LA River often. This bridge would allow for safe access across the River in an area where there are no safe options for cyclists or pedestrians to cross. Often times I see kids crossing the water. I have had to do this a few times myself and I can attest that the rocks are slippery and could be dangerous at times. I have had conversations with many other cyclists who would benefit greatly from the bridge and are excited about the project. Furthermore, I see a great deal of elderly people and people with small children who like to walk along the path of the river in areas where there is access (some examples are Frogtown, Glendale Bridge and Sunnynook). I see very few of these patrons in North Atwater because they do not have any access to it. I feel that these residents would enjoy walking along the river if they had a practical way of accessing the river path. The fact that there is no access cuts off these residents from a very useful resource that is directly beneficial to their health.

In addition to cycling I am also an avid fly fisherman and would consider the LA River my home water. I have spent numerous hours walking up and down the banks looking for carp. Over the years I have seen the numbers of fisherman multiply in the area. I have even met people who have come from outside of Southern California, such as Northern California and states such as Colorado, Oregon and Utah, who have come to fish in the LA River. It has become a popular stop over spot for fishing tourist because of its reputation as a great carp fishery. The bridge would greatly benefit all the fisherman as well by supplying a safe way to get from one side of the river to the other giving it access to wide array of recreation. It would also show a sense of pride that the city has for one of its greatest natural resources, showing that the City of LA deems the LA River worthy of investment and protection.

Please give serious consideration into continuing with the completion of the North Atwater Bike and Pedestrian Bridge.

Sincerely,

Jimmy Nghe

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Rhonda Rodriguez

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Jason Joseph

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

JeanMarie Wisniewski

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Jim Hasenauer

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Cynthia Hubach

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Jason Rosencrantz

Support for LA River North Atwater Multimodal Bridge

Dear Councilmembers,

I am writing to strongly support the City's construction of the North Atwater Bridge, a critical public access point across the Los Angeles River to Griffith Park that serves all non-motorized modes equally: pedestrians, equestrians and bicyclists.

The Los Angeles River bike path is a regional destination, however it is hard to access from communities on the east bank of the river. This bridge will provide a safe, convenient connection from residential communities on the east side to both the bike path and all the other recreational opportunities in Griffith Park. We need this bridge to fully enjoy the amazing public resources our area has to offer!

One of the secured sources of funding is Active Transportation Program (ATP). ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program (TAP), Bicycle Transportation Account (BTA), and State Safe Routes to Schools. This bridge will provide a safe facility for all non-motorized users.

I believe the North Atwater Bridge project will greatly benefit my community and so I urge the City to provide the remaining funds needed to begin construction of this project right away. If you have any questions about my support, I can be reached at the information below.

Sincerely,

Ricardo Diaz
