Council File No: 12-0460-S4

Comments for Public Posting: As a stakeholder in the CD12 area of Chatsworth, I completely disagree with the proposed Neighborhood Council changes to codes in Council File 12-0460-S4. Neighborhood Councils should play an active advisory role, providing input in the land use and development of their own communities, which are communities they know best because they are active stakeholders and local volunteers! This includes horse-keeping properties and their rights! We have many equestrian properties in the Chatsworth Neighborhood Council (CD12) area. The Chatsworth Neighborhood Council is unique, because of horse keeping and preserved open land in Chatsworth. The proposed changes to the code do not allow Neighborhood Councils the opportunity to implement their city council-liaison commitment to have an advisory role and their input in their local projects. I fully oppose the proposed changes.
