Comments for Public Posting: Miki Jackson for AHF/HHR/HHF. We have concerns that the scope of this project will have impacts that are not being fully evaluated. The transfer from the CRA is also concerning. At a time when we are in a severe crisis of homelessness with too few affordable units for low and very low income residents we are concerned at the using of this property for yet another high end development that will worsen the gentrification effects and ultimately be to the detriment of our residents. We have further concerns about traffic and air quality effects. We hereby adopt all comments of concern about this project.
