THE
**URBAN
WILDLANDS
GROUP**

Honorable Los Angeles City Councilmembers:

Thank you for hearing Council File 14-0518 on April 19th, 2016.

As population pressures expand, it is paramount to maintain the environmental qualities that make Los Angeles such an amazing place in which both to live and visit. By supporting Councilmember Koretz's proposed Wildlife Corridor Ordinance, Citizens for Los Angeles Wildlife, Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority and the undersigned groups, representing more than 380,000 members and supporters in California, express a deep commitment to preserve habitat connectivity in the Santa Monica Mountains between Griffith Park and the San Diego (I-405) freeway.

The objective of the motion is to establish a Regional Wildlife Habitat Linkage Zone in this unique section of the Santa Monica Mountains that extends almost to downtown. Within this Zone, a new City Ordinance would require the preparation of a habitat constraints analysis prior to the construction of a new home or the creation of new lots. Within the Zone, just one improperly sited single-family residence could permanently sever the movement of larger mammals and subsequently disrupt ecosystems between the I-405 freeway and Griffith Park. As part of the process, significant development or blockage of critical habitat connections would be prohibited within the Zone.

The sustainability of our urban wildlife populations is at a dangerous tipping point. Please protect and enhance the Public Trust by adopting this innovative motion.

Respectfully,

Co-Directors Alison Simard, Tony Tucci, Shawn Silver
Citizens for Los Angeles Wildlife (CLAW)

Re: LA CITY COUNCIL FILE 14-0518 - Support Wildlife Habitat Linkage Zones

Dear Chairman Huizar and Honorable Members of the PLUM Committee,

I am a Citizen for Los Angeles Wildlife and I support a Wildlife Habitat Linkage Zone ordinance. The Santa Monica Mountains is a special mountain range eco-system that runs through the heart of Los Angeles. LA City's eastern portion of urbanized canyons and hillsides between the I-405 and I-5 freeways is a *critical Wildlife habitat Linkage Zone* that should be established in our municipal code in order to protect the migratory patterns and habitats of our native animals. As part of the ordinance, please make sure every new building project undergoes a checklist and review for wildlife habitat connectivity and permeability.

Sincerely,

Name & Address (Please print clearly)

Allison Balthazar
