Honorable Chair Hernandez and Committee Members:

## **RE: LOS ANGELES CITY HEALTH COMMISSION 2023 ANNUAL REPORT**

At a regular meeting of the Los Angeles City Health Commission (Commission), held on June 10, 2024, the Commission approved the Los Angeles City Health Commission 2023 Annual Report (2023 Report).

The Commission's 2023 Report examines three major health topics that have an immediate impact on the City of Los Angeles and offers several policy recommendations for each: Homelessness, Healthy Living, and Medical Services. Several subject matter experts presented on the various subtopics under each of these main topics, providing valuable information that contributed in the development of the recommendations included in the 2023 Report.

Pursuant to Ordinance No. 183093, the Commission requests the opportunity to present its 2023 Report to the City Council for consideration.

Respectfully,

LOS ANGELES CITY HEALTH COMMISSION
