●The morning of January 18th. Correspondent reporter/LA Simon Bae.

—LA cops don't carry guns?

— LA City Councilman, are you out of your mind? Pistol accidents are inevitable now. Pistol accidents happen even to young children... You should understand more deeply about pistol accidents during police work in today's harsh social environment.

— Even if such an accident occurs, it is fortunate compared to the situation of serious security instability.

—City council members [Think of two or three more, not just one]. Peace does not come when the police do not possess pistols. With the extension of the Tademic crisis and the worsening economic recession, the poor people's schizophrenia, social resistance, shock and dissatisfied murders increase... It is important to know that the image of police wearing, contrasting, and responding to pistols has considerable psychological effects.

— Lastly, LA city council members? Opposition to possession of police pistols is the same logic as married men: women using separate rooms. Police are pistols, city councilors are responsible for observing the city.
