Comments for Public Posting: What is going to be done about the RVs on Jefferson?!?! They have signs by the RVs telling drivers to slow down when we are driving the speed limit or people will run into the streets (from the RV's) telling people to slow down and be quiet. Someone put cones in the driving lane, so there is only one lane to drive in as we are not ALLOWED to use the lane directly next to the bike lane per the RV dwellers. There are tents and encampments there. A couple of years ago, there was a fire in the wetlands by the RV's and the fire department had no access to the hydrant as there were RV's blocking it. Fact of the matter is, there were many fires in the wetlands, since the RV's move in, this is dangerous as its by the gas dep, residents live in this area and RV's block the fire dept from doing their job. They need to be moved/towed. There are safety issues with them due to the fires, people running into the street, if we drive in the street, they are dumping sewage into the wetlands and this is not good for the environment. I think something should be done and do not believe they should be given an "option" of accepting housing or staying.
