

June 21, 2015

Dear City Council Members,
I am writing to you
all to request very strongly
that you please vote no
on the measure to allow
the government to confiscate
the material goods and
property of the homeless
people who are living on
the street. Confiscating
their property would be
cruel and would be a
denial of their rights as
human beings and their
civil rights as citizens of
this country. Most of
the homeless people are
not living homeless out of
choice, they have fallen
on hard times. And I
believe the government
should, until such time
that it can make
available low income
housing and shelter as

not opportunities (and for those who need them, rental facilities). The government should allow the homeless people to keep their material goods and property. I am certainly not humanely, they need their property, what little they have as much as we need also.

I know that A. Goreman has been working hard to make housing & shelter available for homeless people and I commend that, but with such time that all homeless people are crowded of shelter and are no longer out of necessity and circumstances living on the street, the homeless people have a right to have their property just like the other citizens of their country. I am sure that we can make good right to just like the other citizens of the country. I repeat human beings.

21)

They ~~are~~ are human beings
with rights. Please vote
no on the measure to
confiscate their property.
Have mercy. Thank you.

Sincerely,

Liz Provenzano
Brookdale Blendale
