

Los Angeles Department of City Planning RECOMMENDATION REPORT

CULTURAL HERITAGE COMMISSION

CASE NO.: CHC-2010-352-HCM
ENV-2010-353-CE

HEARING DATE: May 12, 2015
TIME: 10:00 AM
PLACE: City Hall, Room 1010
200 N. Spring Street
Los Angeles, CA
90012

Location: 5863 W. Tuxedo Terrace
Council District: 4
Community Plan Area: Hollywood
Area Planning Commission: Central
Neighborhood Council: Hollywood United
Legal Description: Lot 13 of TR 4366

PROJECT: Historic-Cultural Monument Application for the
GILLESPIE HOUSE

REQUEST: Declare the property a Historic-Cultural Monument

OWNER(S): Billy J. and Ruth E. Russell
5863 W. Tuxedo Terrace
Los Angeles, CA 90068

APPLICANT: Karen Russell
5863 W. Tuxedo Terrace
Los Angeles, CA 90068

RECOMMENDATION That the Cultural Heritage Commission:

1. Declare the subject property a Historic-Cultural Monument per Los Angeles Administrative Code Chapter 9, Division 22, Article 1, Section 22.171.7.
2. Adopt the staff report and findings.

MICHAEL J. LOGRANDE

Ken Bernstein, AICP, Manager
Office of Historic Resources

Lambert M. Giessinger, Preservation Architect
Office of Historic Resources

Nels Youngborg, Preservation Planner
Office of Historic Resources

Attachments: Historic-Cultural Monument Application

FINDINGS

- The property embodies "the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction" as an example of the French Normandy style.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon) building or structure of particular historic or cultural significance to the City of Los Angeles, such as historic structures or sites in which the broad cultural, economic, or social history of the nation, State or community is reflected or exemplified, or which are identified with historic personages or with important events in the main currents of national, State or local history or which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction, or a notable work of a master builder, designer or architect whose individual genius influenced his age.

SUMMARY

Built in 1925 and located in the Hollywood Hills area, this two-story single-family residence exhibits character-defining features of the French Normandy style. The subject property is irregular in plan and set on a sloping lot. The subject building has a conical and gabled roof covered with composition shingles and exhibits six pitched gables. The exterior features a stucco finish and wood trim. Windows are a combination of glass and wood, light casement, fixed-pane, and leaded glass windows. Some windows are set within the hand trowled stucco surface with stucco covered sills. A four paneled stained glass window depicting medieval-style faces is on an elevation opposite the rear garden. The main entry features an open porch set onto the side of a central conical turret with a simple pointed arch recess with a circular-arched wooden door made of horizontal slats. The subject building also has a tile porch, stone steps, and a single-car garage situated at the eastern portion of the property. Significant interior spaces include a two-story living room with a barrel arched ceiling, peaked interior doors, a split-level first floor, circular staircase to second floor, and an arched ceiling in the master bedroom. The interior also includes a cast concrete fireplace mantel with a flared top, ogee arch, and a cast stone central arch flanked by winged gargoyles. Brick paving and landscape features surround the subject building.

The proposed Gillespie House historic monument was designed by architect Frederick A. Hanson for his uncle Anthony D. Hanson. The subject building is adjacent to a house with similar design features that was also designed by Frederick A. Hanson as his own residence (HCM #1031). In 1926 the subject property was sold to Dorothy Gillespie, a widow with two grown children, one of which was Albert "Buddy" Gillespie who was Director of Special Effects for MGM from 1924 to 1965. She left the house to her daughter, Kathryn, in 1931. Frederick A. Hanson, who continued to live next door until his death in 1973, was also the principal architect for Forest Lawn Mortuaries for many years. Between 1960 and 1976, the building was home to Oscar-winning sound engineer Charles Grenzbach who lived at the home when he completed some of his most important work including "The Godfather" and "Chinatown." The Gillespie House also appears to be associated with notable writer Charles Bukowski, whose residence from 1963 to 1972 was designated in 2008 (HCM #912). Bukowski's girlfriend, writer Liza Williams, lived at Tuxedo Terrace in the 1970s and was the inspiration for the character "DeeDee" in his novel *Women* (1978). More recently, the home was owned by fashion designer

L'Wren Scott, notably known for being the girlfriend of Mick Jagger, who named one of her fashion lines the Tuxedo Terrace Collection.

The subject application involved a reconsideration of a property that was once denied HCM status. A new application for a previously-declined site may not be placed on the Cultural Heritage Commission (CHC) agenda unless a Commission committee report determined that one or both of the following events have occurred:

1. Substantial new historic information has been documented which makes the latest application materially different from the previous one, or
2. Subsequent architectural rehabilitation which meets the U.S. Secretary of the Interior's Standards for Rehabilitation has been completed.

The Gillespie House was taken under consideration for Historic-Cultural Monument (HCM) status on March 4, 2010 and was denied final approval on May 6, 2010. At the time, the commission found that the property did not meet criteria for designation as an HCM because it was not in a condition which warranted it eligible as a distinctive example of French Normandy style architecture. This was mainly due to alterations made by the previous owner, many of which have been subsequently reversed. Also, the documentation demonstrating a connection to historic personage Charles Bukowski through girlfriend Liza Williams, a former owner, was seen as too loosely tied to the property. Former owner L'Wren Scott was considered too contemporary at the time of the previous submission to merit identification with historic personages. However, the additional notable personalities mentioned in the previous paragraph that have lived in or affected the structure have been discovered and are presented in the revised application.

Alterations to the subject property include a large stucco wall that was added to the property line which obscures the view of the property from the street and public right of way. Restoration efforts by the current owners include the restored garage, removal of the added skylights, and restoration of the round dining room window.

Previously, the Commission found that the alterations significantly undermined the home's ability to represent its original architectural style. However, since rehabilitation and restoration have occurred, the alterations have been remedied and the property is again representative of the original style.

The new application for this previously denied property provides substantial new historic information regarding the significant personages associated with this property and the restoration to the primary building. A subcommittee of the CHC, consisting of Commissioners Barron and Kennard, reviewed the application and recommended that the Commission schedule the application for a reconsideration hearing.

DISCUSSION

Gillespie House successfully meets one of the specified Historic-Cultural Monument criteria: 1) embodies "the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction." The property contains the character defining features of French Normandy architecture and was constructed within the period of significance for this style in Los Angeles.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") FINDINGS

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 *"consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment."*

State of California CEQA Guidelines Article 19, Section 15331, Class 31 *"consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings."*

The designation of Gillespie House as a Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of irreplaceable historic structures. The Secretary of the Interior's Standards of Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.

The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of historic buildings in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings.

BACKGROUND

On March 19th, 2015 the Cultural Heritage Commission took the property under consideration. On April 2nd, a subcommittee of the Commission consisting of Commissioners Milovsky and Irvine toured the property accompanied by a staff person from the Office of Historic Resources.

HISTORIC-CULTURAL MONUMENT APPLICATION

Please Note: This application is intended to be viewed as a supplement to the previous application made in December 2009.

DESCRIPTION

8. ARCHITECTURAL STYLE FRENCH NORMANDY
(SEE STYLE GUIDE)
9. STATE PRESENT PHYSICAL DESCRIPTION OF THE SITE OR STRUCTURE (SEE OPTIONAL DESCRIPTION WORK SHEET, 1 PAGE MAXIMUM)

LOCATED IN THE HOLLYWOOD HILLS, THIS 2 STORY SINGLE FAMILY RESIDENCE BUILT IN 1926 EXHIBITS TYPICAL FEATURES OF THE FRENCH NORMANDY STYLE. AS A 1920'S FANTASY OF A FRENCH MEDIEVAL CASTLE IN MINIATURE, IT ALSO HAS QUALITIES OF THE MORE WHIMSICAL STORYBOOK STYLE.

THE 1400 SQUARE FOOT HOUSE HAS AN IRREGULAR PLAN ON A SLOPING LOT WITH A ONE CAR GARAGE NOT LARGE ENOUGH FOR MOST MODERN CARS. THREE LEVELS ARE CONNECTED BY A SPIRAL STAIRCASE LOCATED INSIDE A CENTRAL TURRET WITH A CONICAL ROOF. THE HOUSE HAS SIX PITCHED GABLES, HAND TROWELED STUCCO WALLS, AND WOOD TRIM. THE INTERIOR FEATURES A 1-1/2 STORY GREAT ROOM WITH A ROUND ARCHED CEILING AND A LARGE CONCRETE FIREPLACE. A HIGH STUCCO PRIVACY WALL, WHICH IS NOT ORIGINAL, FRONTS THE HOUSE ON TUXEDO TERRACE.

DESPITE THE PREVIOUS OWNER'S ATTEMPTS AT REMODELING, THE HOUSE IS NOW VERY CLOSE TO THE ARCHITECT'S ORIGINAL DESIGN. AN EXTENSIVE COLLECTION OF PHOTOGRAPHS FROM BUDDY GILLESPIE'S NEPHEW, WILLIAM DODS, HAS MADE IT POSSIBLE FOR THE CURRENT OWNERS TO SUBSTANTIALLY REVERSE ARCHITECTURAL INTEGRITY ISSUES, AND TO CONTINUE TO REVERSE ANY ISSUES THAT MAY REMAIN.

THE HOUSE FEATURES THE ARCHITECT'S ORIGINAL COURTYARD DESIGN COMPLETE WITH LILY POND, EXTENSIVE 1920'S SIMONS BRICK WALKWAYS, AND STONEMASONRY PLANTERS MADE OF LOCAL STONES FROM BRONSON CANYON. THE BRICK COURTYARD EXTENDS BETWEEN THE HOUSE AND THE ARCHITECT'S HOUSE NEXT DOOR. THESE TWO HOUSES WERE DESIGNED TOGETHER TO CREATE, ALONG WITH THREE HANSON HOUSES ACROSS THE STREET, THE FEELING OF A MEDIEVAL VILLAGE IN HOLLYWOOD.

THE WIZARD OF MGM

(BEARMANOR MEDIA)

by A. Arnold Gillespie. Edited by Philip J. Riley and Robert A. Welch. Introduction by Spencer Tracy and Katharine Hepburn

For forty years, A. Arnold "Buddy" Gillespie made movie history as the king of visual effects at MGM. From Tarzan swinging on a supposed vine to a tornado ripping through Kansas in *The Wizard of Oz*, he and his team created true movie magic. Perhaps "invented" would be a better word, as they devised solutions to moviemaking problems no one had ever tackled before, beginning in the silent film era and continuing through such milestones as *Mutiny on the Bounty*, *The Good Earth*, *Forbidden Planet*, and both versions of *Ben-Hur*. Back in the 1960s, shortly after his retirement from Metro, Gillespie started working on a book about his career, selecting photos and incorporating carefully-saved work sheets for each job—from dramatizing an earthquake in *San Francisco* to crafting a miniature aircraft carrier for *Thirty Seconds Over Tokyo*.

Here's a brief sample of what he says about the quake and a scene in which a brick wall appeared to bury Clark Gable: "That was a full-sized mechanical dilly. We dreamed up some firsts, I believe, on this one... The film was necessarily scissored just as the wall started to tumble. The 'bricks' were by courtesy of the L.A. Paper Box Co., the 'mortar' was an extremely lightweight

plaster mixture, and the illusion of a gory crushed demise, much too believable for even the 'King' to have scrambled smilingly out from under, resulted in the necessary film clipping.

"The big theater-night-club set, for this picture, in which Miss MacDonald warbled her lovely lyric soprano, occupied all of Stage 12 at M.G.M. There had been some argument about the destructive movement of an earthquake. I supported the 'horizontal' theory while others insisted that it was the vertical, rolling 'ups and downs' which caused the damage. An expert from California Polytechnic College in Pasadena was contacted, and I won. In fact, he commented that our 'schematic' for the big set, actually represented the very kind of an 'earthquake table' upon which, in small scale, Cal Tech experiments were conducted."

On the page facing these words are behind-the-scenes photos revealing a raised set on railroad car wheels with "breakaway balcony, faux ceiling, and 'brick' walls."

Unfortunately, no one was willing to publish Gillespie's manuscript, although friends and colleagues were enthusiastic. He passed away in 1978. Finally, after more than forty years, his grandson, Robert Welch, film book editor Philip J. Riley, and BearManor Media have made this long-awaited project a reality.

I doubt that anyone who's interested in the hows and wherefores of visual effects—or the studio system, for that matter—will be disappointed. The book is told in Gillespie's avuncular voice, and fortunately he is generous about sharing credit with the many skilled specialists who also toiled at MGM. Storyboards, photos showing the components of complicated shots, mattes, miniatures, architectural drawings, breakdowns—even detailed invoices—fill the 375 oversized pages of this paperbound volume.

But, as much as any other ingredient, it is Gillespie's positive outlook and optimism that characterize this combination memoir and manual. It looks back at a golden age made so by creative, thoughtful, hard-working men like Buddy Gillespie.

THE WIZARD OF MGM by A. Arnold Gillespie; Edited by Philip J. Riley and Robert A. Welch. Introduction by Spencer Tracy and Katharine Hepburn (BearManor Media)

Memories of a Friend, a Teacher and a Fighter

L'Wren Scott Remembered by Cathy Horyn

By CATHY HORYN MARCH 18, 2014

L'Wren Scott was beguiling to her friends, so I can't imagine what strangers thought of her. There was her height: 6-foot-7 in heels, which made me (5-foot-7) feel like a shrimp.

I remember sitting on a trunk backstage at Madison Square Garden, watching a parade of guests come to greet her boyfriend, Mick Jagger, at the start of the Rolling Stones' Bigger Bang Tour, in 2005. There, after Ahmet Ertegun, were Mary-Kate and Ashley Olsen, then undergrads, and L'Wren beamed and swept down like Glinda the Good Witch to hug the girls.

The gesture conveyed much, but mainly warmth and empathy. Despite her Amazonian height and courtesan-like glamour, L'Wren could rapidly close the distance to another human being. And this was especially true for the most insecure of humans: celebrities. You felt at ease and never overshadowed by her, or indeed her famous boyfriend.

L'Wren was made of softer clay, to use a phrase of the writer Lesley Blanch. The Olsens were then struggling for acceptance, as adults, as would-be designers, and L'Wren, who wasn't big on group opinion, offered her encouragement. And this was while she was quietly starting her own label and facing the inevitable detractors.

I took note of many things she said or did over the years that I knew her. She was a marvelous teacher, in a way; few people, outside of a French couture salon or a Hollywood costume shop, knew as many practical dressmaker tricks as she did, illusions that bolstered your confidence as they revealed (to me) fundamental lessons about dressing.

Even if a woman didn't relate to L'Wren's style (and it was a very specific style, based on her fairly old-fashioned aesthetic), I used to think she would have an empire if she could talk one-on-one with her customers. That's no doubt a reason so many actresses stuck with L'Wren: Nicole Kidman, Ellen Barkin, Sarah Jessica Parker, Julianne Moore, Christina Hendricks. She was so well informed and prepared, and at the same time so funny and offhand about the fuss, that you naturally trusted her.

And she didn't talk about her friends or clients. O.K., a little, but nothing that really mattered. This was something else I learned from L'Wren and admired in an increasingly blabbering world: She didn't share. She had firm boundaries, and they applied equally to her relationships and confidences.

Which is not to say she didn't give great girlfriend advice ("Dr. Scott is on the line," she wrote in a text last fall), but she had enormous self-control (or self-respect?) when it came to her privacy. She once made a reference to a husband in her past, maybe two husbands — I wasn't sure. Anyhow, I knew not to pursue the matter.

Our friendship had its roots in the mid-1990s, when she was working as a fashion coordinator for the Academy Awards and styling for the photographer Herb Ritts in Los Angeles, often for his work in *Vanity Fair*. We became better acquainted around 2000, when our mutual friend Ronnie Newhouse brought us together over lunch. L'Wren was then living between Los Angeles, where she had a home in Hollywood Hills, and London (or Paris), and, I think, already seeing Mick, although their romance wasn't public.

In later years, L'Wren spent more and more time in Europe until she and Mick finally settled into a large house in London and a Paris apartment with room for his children. She started her label in a much smaller Paris flat, on the Rue de Bellechasse, using a bedroom for a studio and holding small dinner parties during the collections in the front hall. I remember evenings with Hedi Slimane and François-Henri Pinault; many others, too.

And in those days, her business really ran on a shoestring, with L'Wren and maybe two other women doing all the work. She had an incredible work ethic; if there was one thing that bound all her friends, wherever they were born, it was that. And there was no job she wasn't willing to do herself, which became a problem as her company got bigger.

Eventually, L'Wren sold her house in Los Angeles. I've been thinking a lot about that charming little house, with its funky walled garden and aura of silent-era Hollywood, in the days since her death. I visited the house only once — for an alfresco Thanksgiving dinner in 2006, with Mick, Charlie Watts, Ronnie and Jo Wood, and our friend the publicist Ina Treciokas, before the band played at Dodger Stadium — but I knew it represented her independence and everything she had built. She was a success in her relationship with Mick, I believe, because she maintained some of that independence, and for his part he truly welcomed her friends into their life and made us feel at home.

But I can't help thinking, now, that a huge part of L'Wren's spirit, what gave her grit and endurance, remained in the West. And without it, maybe she was a little lost, a little less sure of herself.

Like many small designers, she had problems managing her business: cash flow, finding the right managers, getting her goods out of Italian factories on schedule. Two years ago, our friendship was tested when, after hearing her troubles, I told her she should give herself a time limit to resolve matters or get out. Putting her health in jeopardy because of stress was not worth it, I told her.

She didn't like the advice. And true to form, she dug in. She got her house in order and struck a number of deals, including one last year with Banana Republic, that gave her new exposure. In late November, after a week or so with Mick in Natchez, Miss., where he is producing a James Brown biopic, she sent a text from London that said, in part, "mad day fitting AMAZING things!!"

After my partner died in early February, L'Wren was the first to call and send a note. When we finally spoke, two weeks later, I was surprised to hear how rundown and discouraged she sounded. She spoke of production problems, forcing her to cancel her fall show. Again, I urged her to put her health first.

Besides, I told her: "You're entrepreneurial — that's your strength. You'll have new ideas. Just give yourself a break now."

I sent her a text on March 12, checking in. She didn't reply, but that wasn't unusual. I learned since her death that she was planning to close her business, with an announcement this week. Still, as painful as the decision must have been for her, I wouldn't draw any conclusions from it about her state of mind. Nor should any credence be given to reports of a breakup with Mick. It's rubbish.

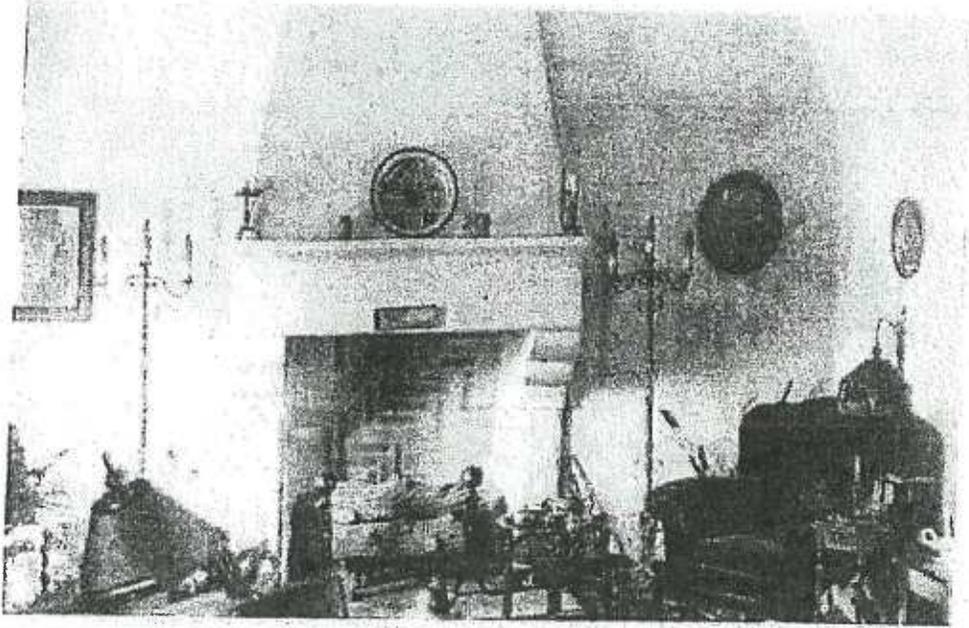

She was with friends on Sunday night, and, yes, they were deeply concerned about her, but, no, they didn't think she would do something so desperate. Not L'Wren.

Her death is inexplicable to me, and it makes me angry, too. Angry because it's the loss of a vital, intelligent woman, and angry because, this once, I don't want her to be a mystery to me.

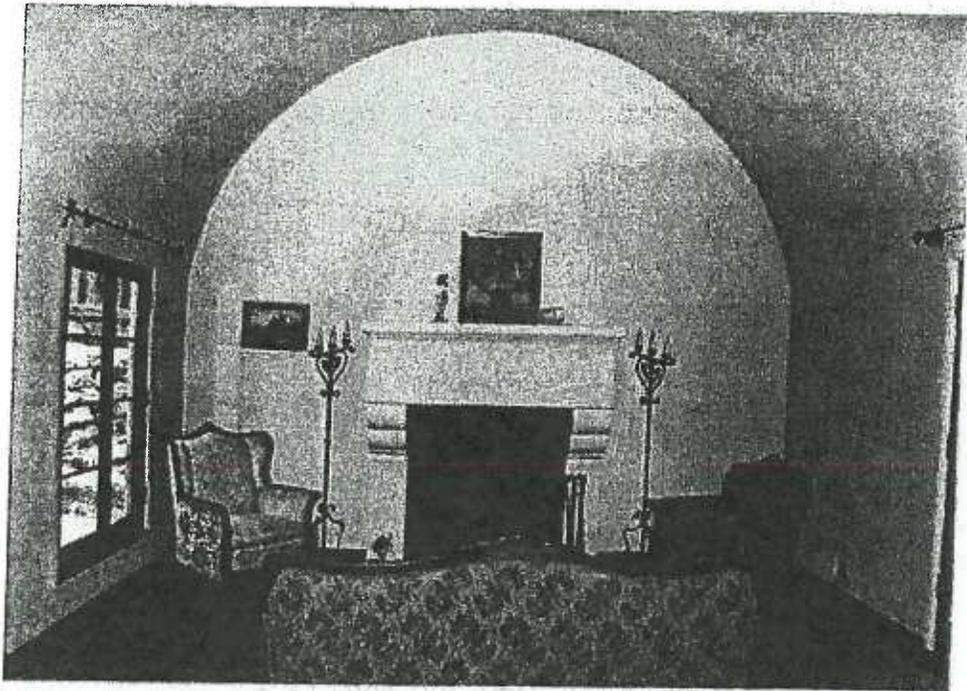

From 1999 to 2014, Cathy Horyn was the fashion critic for The New York Times.

A version of this article appears in print on March 20, 2014, on page E9 of the New York edition with the headline: Memories of a Friend, a Teacher and a Fighter.

20. DEVELOPMENT OF LOS ANGELES BECAUSE FREDERICK HANSON WAS THE PRINCIPAL ARCHITECT AT THE ORIGINAL FOREST LAWN IN GLENDALE AND DESIGNED MUCH OF THE INFRASTRUCTURE OF THE GLENDALE AND HOLLYWOOD HILLS FACILITIES. A 1930 SOUTHWEST BUILDER AND CONTRACTOR ARTICLE NOTES HIS DESIGN OF THE GREAT MAUSOLEUM IN GLENDALE. IN 1940, THE MEMORIAL PARK'S HEAD, HUBERT EATON, PUT HANSON IN CHARGE OF LOCATING A MASSIVE PAINTING OF JESUS' CRUCIFIXION THAT HAD BEEN PAINTED BY POLISH ARTIST JAN STYKA AND BROUGHT TO THE UNITED STATES IN 1904. TOO LARGE TO DISPLAY AT THE ST. LOUIS WORLD'S FAIR, THE WORK WAS PLACED IN STORAGE AND NEVER RETURNED TO EUROPE AS THE ARTIST HAD TO SELL IT AFTER HIS OTHER WORKS AT THE FAIR WERE DESTROYED BY FIRE. AFTER TRACING THE WORK THROUGH VARIOUS OWNERS, ALL OF WHOM MERELY STORED IT, HANSON FINALLY LOCATED IT STORED BACKSTAGE AT THE CHICAGO OPERA HOUSE. THE PAINTING WAS BROUGHT TO LOS ANGELES AND HANSON DESIGNED THE HALL THAT NOW DISPLAYS IT IN GLENDALE. IN 1925, HANSON DESIGNED THE TWO FRENCH NORMANDY STYLE "STORYBOOK" HOUSES AT 5823 AND 5827 TUXEDO TERRACE IN A SUBDIVISION KNOWN AS CANYON VIEW ESTATES, WHICH WAS SUBDIVIDED AS TRACT NO. 4366 IN 1921. THESE HOMES WERE FOR HIMSELF AT WHAT WAS IS NOW 5867 TUXEDO TERRACE AND FOR HIS UNCLE, ANTHONY HANSON, AT WHAT IS NOW 5863 TUXEDO TERRACE. THE DESIGN IS FRENCH NORMANDY, BUT THE HOUSE HAS THE QUALITY OF THE STORY-BOOK HOUSING THAT BEGAN TO EMERGE IN SOUTHERN CALIFORNIA DURING THE

CITY OF LOS ANGELES
SIGNIFICANCE WORK SHEET
CONTINUED

1920s. This concept was heavily influenced by the movies that were being produced in Hollywood at the time. While Story-Book in concept, the house is more of one architectural style (French Normandy) than many of the more eclectic Story-Book houses. Not much is known about the Gillespie's, who owned the house from 1926 until 1938. The 1930 Census lists Dorothy Gillespie as a widow with two grown children living with her. The following year, her daughter, Kathryn was listed as the owner. Later owners of note include Kenneth Honnold, who next owned the house and served as President and later Board Secretary of the Hollywood Junior Chamber of Commerce. Charles W. Grenzbach, a sound producer in a number of motion pictures. Around 1970 the house was lived in by Liza Williams, who was a writer and had worked for several record companies. She either rented from or lived with Charles Grenzbach's widow, Mabel. Around this time, she became the girlfriend of writer Charles Bukowski, who immortalized her and the house as the character "DeeDee" in his novel, "Women", published in 1978, and his poem, "The Lady in the Castle" in his book, "You Get So Alone at Times that it Just Makes Sense" (See Attached Stanza). The house was later owned by Alexander Dobos, a real estate agent who now runs a major promotion of the Big Island of Hawaii. More recently is L'Wren Scott, who is a fashion designer and girlfriend of Mick Jagger of the Rolling Stones. Scott, who bought the house, which Jagger called "The Barbie House", from Dobos in 1994, lived in it until 2009. She pulled a permit in 2006 to make a number of changes, including several rear additions. However, only a small amount of the work was done and the permit was declared expired by Building and Safety in February 2009. The result is that the house remains much as it did when first built. Recent removal of overgrown plantings has revealed a brick courtyard that extends between the Gillespie House and the neighboring Hanson House. It is obvious that the architect's intent was for the two houses to work together as a complete whole. Hanson's contributions to the built environment are, for the most part, limited to the Forest Lawn structures that so elegantly grace the various Memorial Parks. Hanson did not do much work outside of Forest Lawn, but the house at 5863 Tuxedo Terrace is a rare example of his ability to create a domestic structure with the same design skills that he was to use in his great monuments for Forest Lawn.

LEGAL DESCRIPTION

EXHIBIT A

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

Parcel 1

Lot 13 of Tract No. 4366, in the City of Los Angeles, in the County of Los Angeles, State of California, as per map recorded in Book 49, Pages 66 and 67 of maps, in the Office of the County Recorder of said County.

Except that portion described as follows:

Beginning at the most Easterly corner of said Lot 13; thence North $84^{\circ} 05' 50''$ West along the Northerly line of said Lot 13, 34.46 feet; thence Southwesterly along a curve concave to the Northwest having a radius of 30 feet, a distance of 15.22 feet, measured along the arc of said curve; thence South $38^{\circ} 46' 20''$ West tangent to said last mentioned curve at its point of ending, 12.92 feet to a point in the Southeasterly line of said Lot 13; thence Northeasterly along said Southeasterly line, same being a curve concave to the Southeast, tangent to its point of beginning to a line bearing North $38^{\circ} 46' 20''$ East and having a radius of 55 feet, a distance of 54.84 feet, measured along the arc of said curve to the point of beginning.

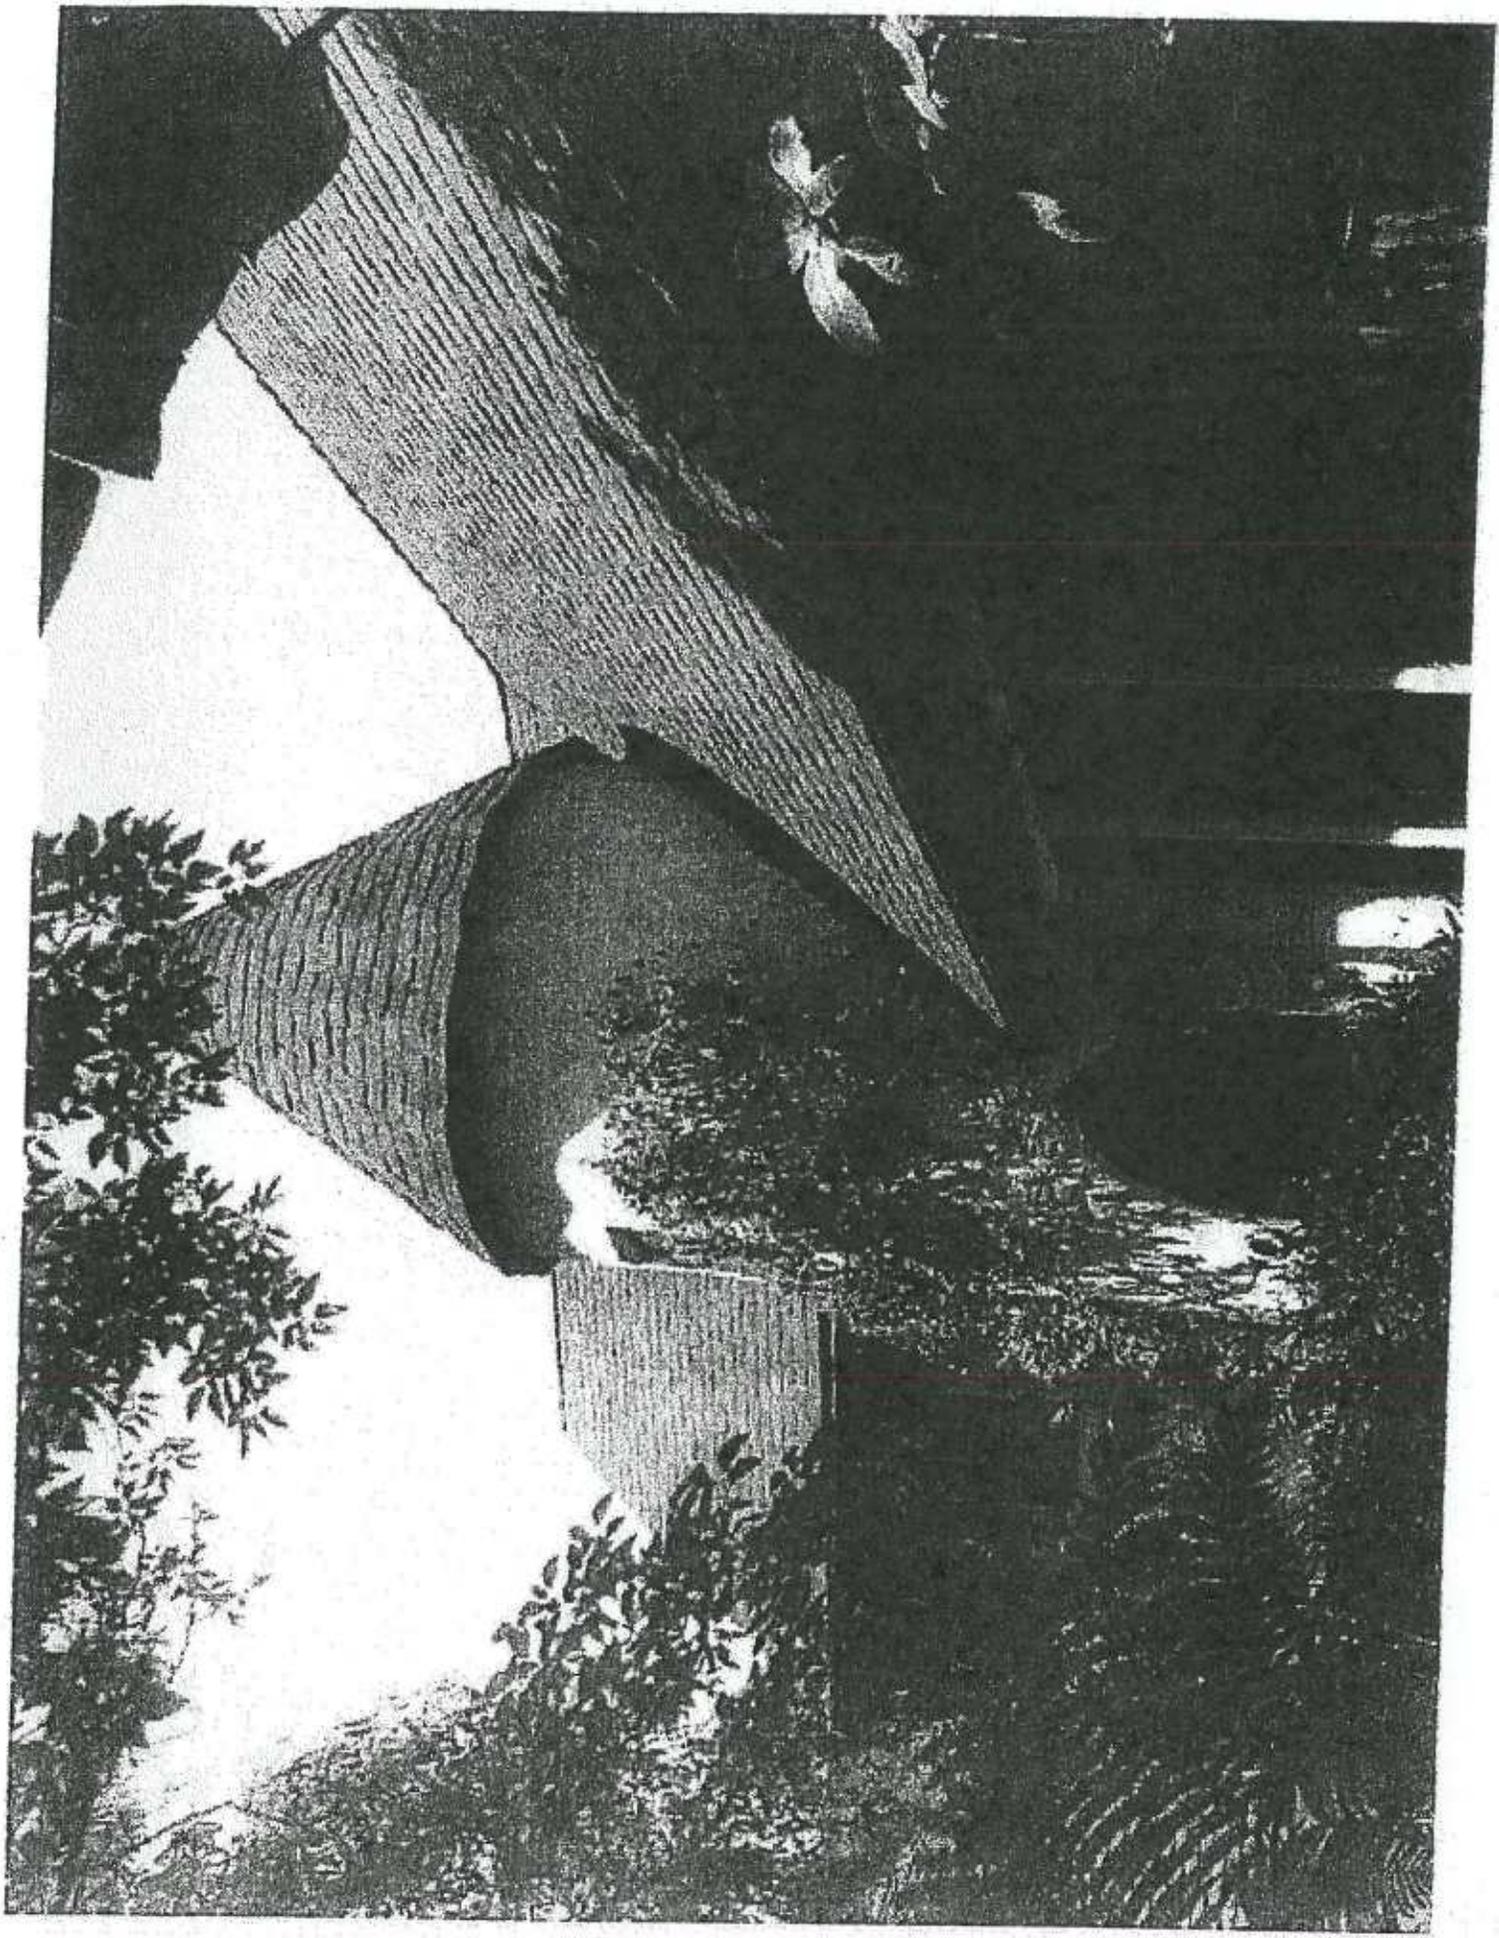

Parcel 2.

All that portion of the Northeast quarter of Section 2, Township 1 South, Range 14 West, San Bernardino Meridian, described as follows:

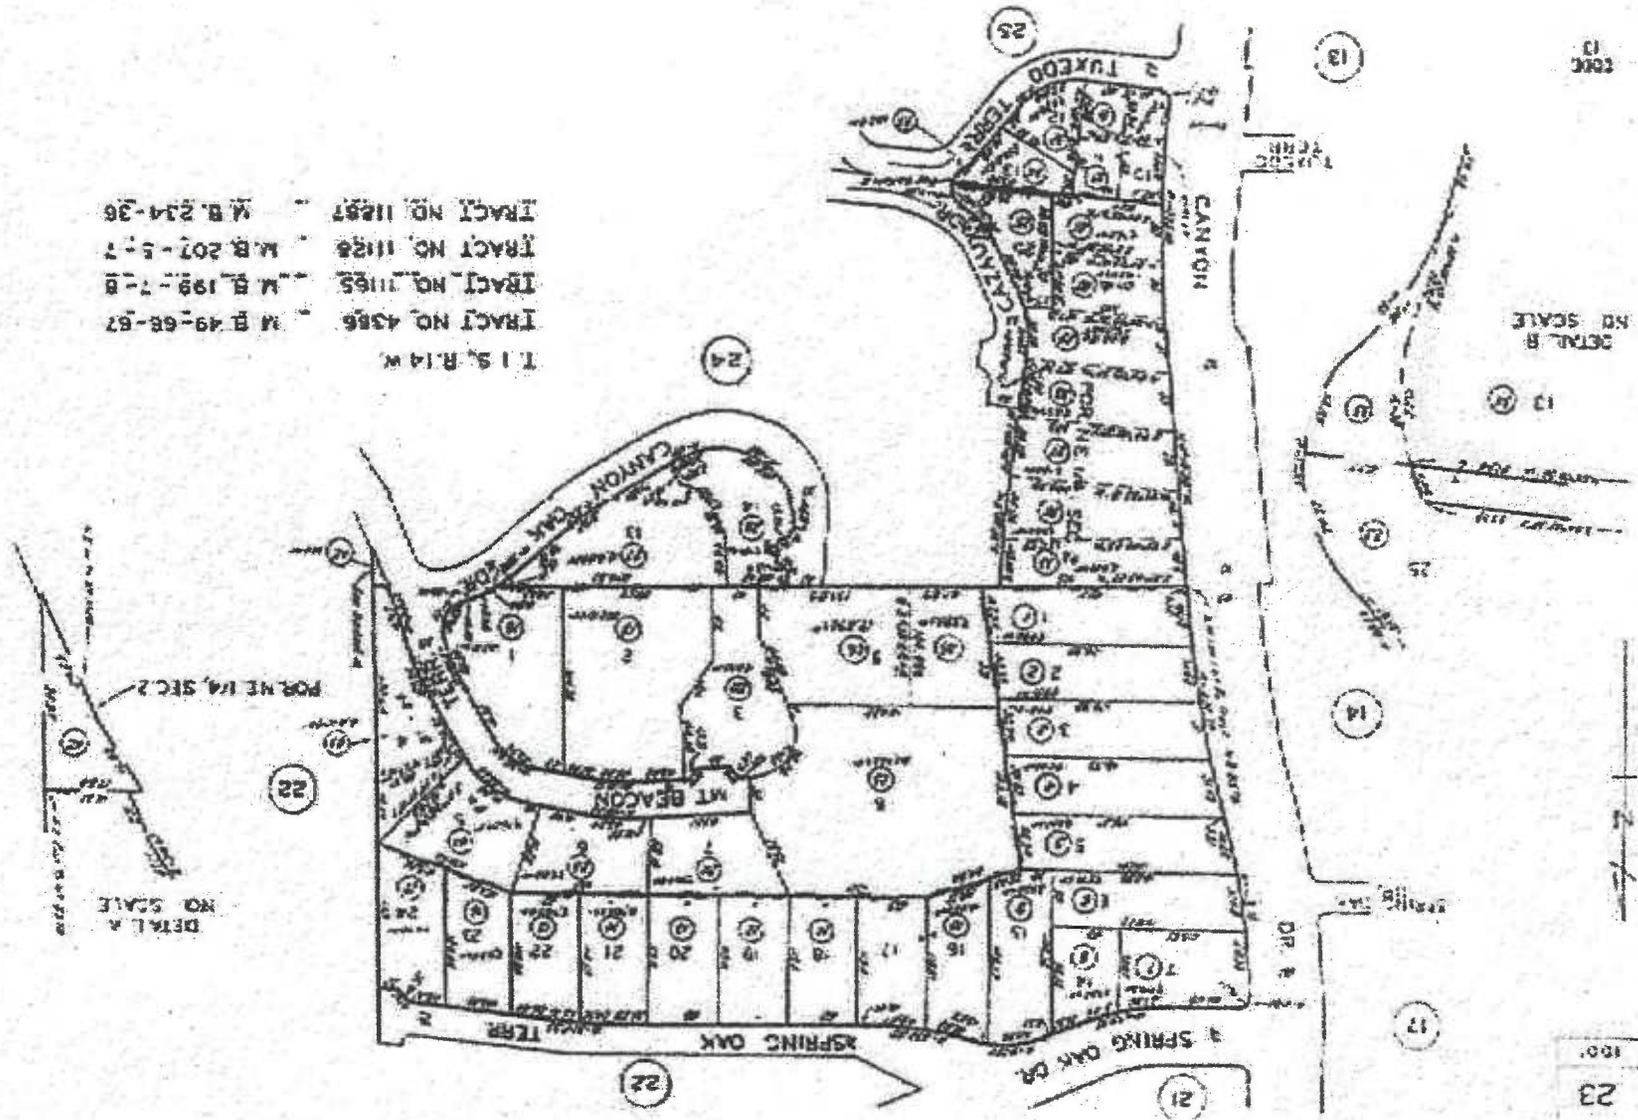

Beginning at the Northwest corner of Lot 13 of Tract 4366, in the City of Los Angeles, as per map recorded in Book 49 Pages 66 and 67 of maps, in the Office of the County Recorder of said County; thence North a distance of 2 feet to a point; thence South $84^{\circ} 05' 50''$ East and parallel to the Northerly line of said Lot 13, a distance of 97.82 feet to a point; thence Southerly and Easterly along a curve concave to the Northwest tangent at the point of beginning to a line bearing South $5^{\circ} 54' 10''$ West having a radius of 30 feet, a distance of 1.99 feet, more or less, measured along the arc of said curve to a point in the Northerly line of said Lot 13, where a tangent to said curve bears South $9^{\circ} 42' 10''$ West, thence North $84^{\circ} 05' 50''$ West along the said Northerly line, thence North $84^{\circ} 05' 50''$ West along the said Northerly line, a distance of 97.54 feet, more or less, to the point of beginning.

Hollywood Hills Story-Book Home Headed to Court

Thursday, March 19, 2009, by Dakota

A reader points out that the 1927 cottage on Tuando Terrace designed for miniature Shetland ponies is headed to probate court on March 26th. But more interesting than the probate sale is the history behind the house. The builder of the home is a man named Fred A. Hanson, who not only built many structures at Forest Lawn, but is known for the story book houses that he designed in the tract below the Oaks and above the Hollywood Oaks in the 1920s. Describing the building process, real estate agent Nobby Purcell explains, "You would go to the sales office and pick out your home." Above is one of the original sales maps. This home here belonged to Hanson and his wife (his wife recently passed away). The two-bedroom, one bath (1,016 sq ft) will head to court priced at \$588,500.

Romanesque Effective in Architectural Treatment of Beautiful Hillside Mausoleum

Detail of entrance to the Memorial Court of Honor, Forest Lawn Memorial Park, Mausoleum, the last and most significant structure recently completed. Plans were prepared by Frederick A. Hanson, in cooperation of the architectural department of Forest Lawn Memorial Park, David C. Allison, Los Angeles, consulting architect.

The Gardens of Memory

During Eaton's trips to England, he was enchanted by the "Gardens of Remembrance" created specifically for cremation burials. Eaton directed his own architecture and engineering department in 1938 to draw up plans for a similar section of "secluded plots separated by plantings" at Forest Lawn. Enclosed in high walls and enhanced by blossoming shrubs and small sculptures, these interment areas were protected by bronze entrance doors that are always locked. Each lot owner is given a "golden key of memory" to protect privacy and solitude. Forest Lawn's first Garden of Memory opened in 1941.

Forest Lawn Celebrates Twenty-Fifth Anniversary of The Builder's Creed

To go from barren, dusty acreage in 1906 to 290 lush green acres containing a park-like cemetery, a crematory, mortuary, flower shop, mausoleum, columbaria, and three non-sectarian churches, all enhanced by major artworks, in twenty-five years was an extraordinary achievement. To commemorate the transformative years since The Builder's Creed was written in 1917, the Forest Lawn staff compiled a beautiful bound scrapbook containing photos of all the employees and presented it to Eaton on January 1, 1942.

Local, regional, and national media took notice of Forest Lawn's transformation as well. Several long features and photos ran in *Time* magazine on August 24, 1942, titled "The Gayest Graveyard." Other significant articles during the decade included an eleven-page spread with thirty-six photos in *Life* magazine on January 3, 1944, which for the first and only time included pictures of the final resting places of many movie stars, including Jean Harlow, Carole Lombard Gable, and Lon Chaney. The *Life* article detailed all the aspects of "everything in one place" and noted that "Forest Lawn's employees are expected to be tactful, reverent and, above all, cheerful. To foster the Forest Lawn spirit, they attend monthly get-togethers where they sing and discuss business problems. They get bonuses for suggesting improvements such as more drinking fountains for visitors. Of the 612 employees, 150 are women—hostesses, morticians,

saleswomen." The next article in that edition of *Time* reflects the wartime mood, with features and photos about submariners and the women who loved them.

The Crucifixion by Jan Styka

Another of Eaton's lifelong passions was to capture in great art the three most significant events in the life of Jesus Christ—the Last Supper, the Crucifixion, and the Resurrection, what came to be known as "The Sacred Trilogy." Obtaining *The Crucifixion* involved substantially more suspense and intrigue than *The Last Supper Window*. On tours of galleries and museums in Europe and the American continents, Eaton searched for a painting of the Crucifixion that featured a strong Christ, readily accepting the challenge of death, but sure of his ultimate victory over it. Eaton knew one thing for sure—a depiction of Christ hanging sorrowfully on the cross, as he had seen countless times in many art forms, was not what he wanted.

From a friend of the Italian minister of fine art, Eaton had heard of a massive, magnificent picture of the Crucifixion, painted by a Polish artist named Jan Styka. It had been displayed in Warsaw at the turn of the century and was hailed as a religious event as well as an artistic masterpiece. But Eaton was unable to locate the painting. Experts in Europe felt it had to be in some gallery or museum on the continent, yet no one could find it. Though he had never seen it, Eaton set out to locate and purchase it. Assisted by colleagues Fred Hanson, Forest Lawn's chief architect, and Harold Morrison, general counsel, and various investigative firms, Eaton discovered that Jan Styka had brought *The Crucifixion* to the United States in 1904, where he was to display it, along with several of his other paintings, at the Louisiana Purchase Exposition in St. Louis.

Unfortunately, no provision had been made for a space at the Exposition to house such a colossal canvas—195 feet long and 45 feet high—so it remained rolled up. Ironically, Styka's paintings that were displayed were destroyed in a fire on the last night of the exposition. On his journey back home to Poland, Styka was penniless, and when he reached New York Harbor, he was unable to pay the freight and duty on his painting. He was forced to

The second part of Eaton's "Sacred Trilogy"--The Crucifixion by Polish artist Jan Styka.

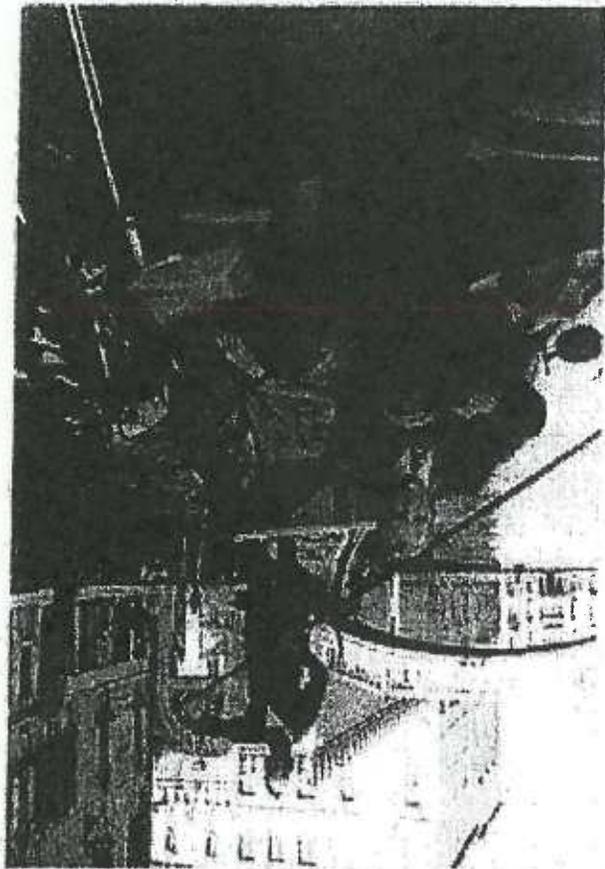

return to Europe without it. Styka died in 1925 without ever seeing his painting again.

Over the next forty years, the painting drifted from one warehouse to another, uncared for and gathering dust. Clues to its whereabouts came in old customs declarations, freight invoices, letters, and trucking receipts. Finally, in 1943, Fred Hanson was dispatched to the Chicago Civic Opera Company. Wrapped around a telephone pole, behind discarded scenery, hidden behind the walls of the opera's vast warehouse, was *The Crucifixion*. Hanson wired Eaton in Los Angeles, saying simply, "It's here." After much legal wrangling, and still without having laid eyes on it himself, Eaton brought the painting to Los Angeles by train. Upon its arrival, he found that the only building large enough even to attempt to hang it in was the Shrine Auditorium in downtown Los Angeles. Eaton rented the auditorium for a day, so that he and the Council of Regents, Forest Lawn's advisors, could examine the painting. When it was ready, Eaton first went in alone.

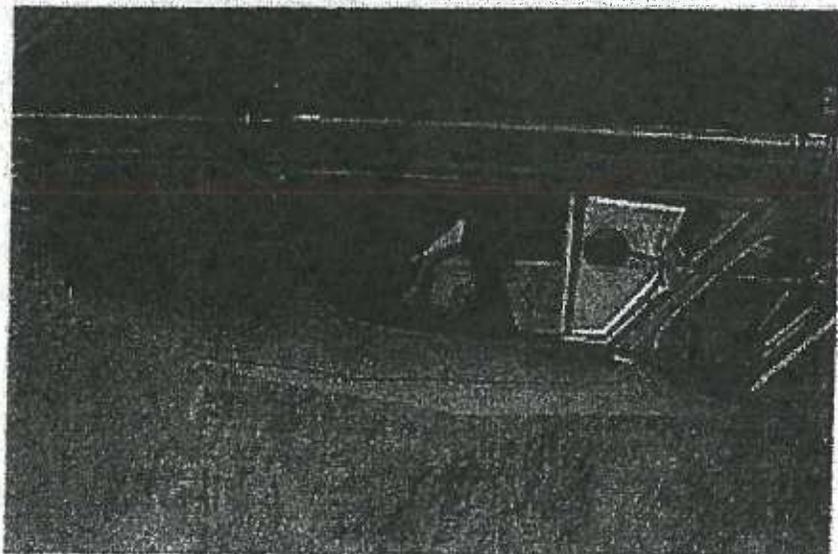

Though in need of cleaning, and viewed under makeshift lighting, *The Crucifixion* was more magnificent than all the glowing pronouncements about it. The scene depicted Jesus Christ clothed in a seamless white garment, standing next to the cross on which he would soon lose His earthly life. Looking upward, He was at peace, strong and confident in His ultimate victory over death. His presence in the center of the enormous painting dominated everything and everyone around Him. This was the image of the Crucifixion Eaton had long sought.

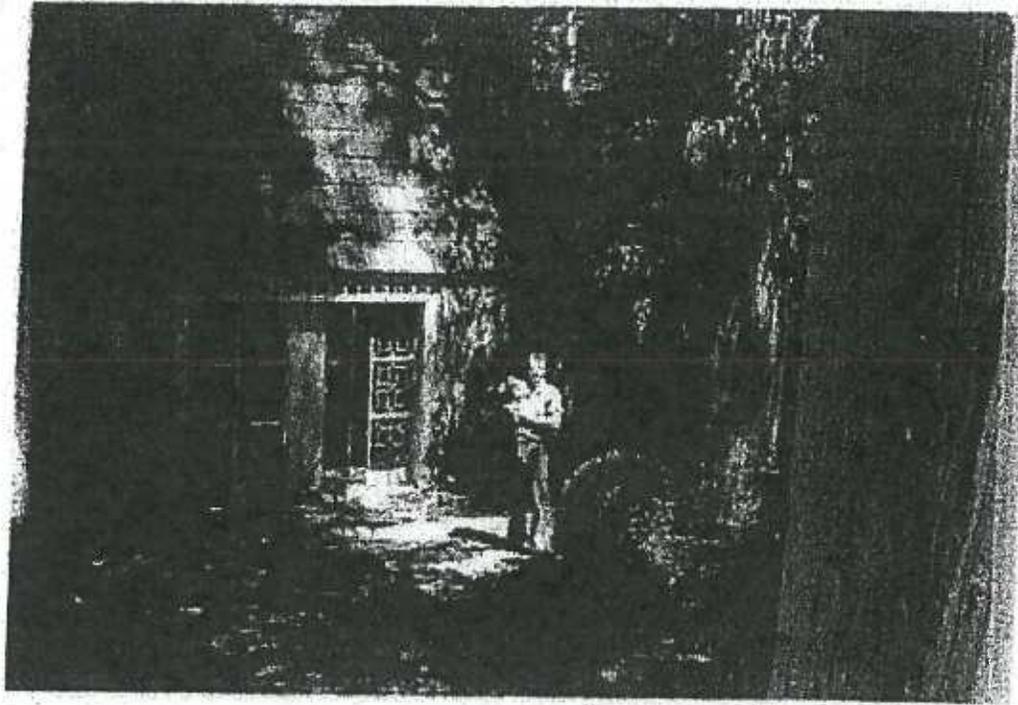

The Council of Regents carefully examined the painting, not only to determine its physical condition, but also to assure themselves beyond any doubt that its spiritual message was worthy of perpetuation. They had agreed among themselves that any portrayal of the Crucifixion must re-create that ancient tragedy in the hearts of its viewers and carry the message of freedom found only in the true concept of Christianity. They found all the qualities for which they searched. There, in the figure of

Frederick Hanson in Venice, Italy, 1950s

Humason Resigns National Junior Chamber Post

Sherman C. Humason, 34 years of age, executive secretary of the United States Junior Chamber of Commerce, has resigned, effective January 1, to accept the secretary-managerhip of the Hollywood Junior Chamber, according to Norris J. Nelson, president of the Hollywood group.

A charter member of the St. Paul Junior Chamber, Humason served in numerous capacities there.

Humason succeeds Kenneth Honnold, who resigned when the rapid growth and enlarged program of the Hollywood Junior Chamber called for a full-time secretary-manager. Honnold remains as secretary of the board of directors.

Howard Hawk's 'El Dorado' Screening in Citywide Release

BY KEVIN THOMAS
Times Staff Writer

When Howard Hawks resumed directing in 1933 with "His Bravery" after a three-year layoff he divided pictures almost by trade with less plot and more characterization and without straying slightly to the right or left—and then began a new phase in his career that continues with his latest story "El Dorado" (citywide).

Indeed, among the few classic Hollywood directors who today and active only Hawks is generally in top form.

Action Film
"His Bravery," "Hallelujah" and "El Dorado" have a lot of action pictures usually without parallel. All three are the handsomely mounted, paced with confidence and attention. But they are also masterpieces of Hawks' so seemingly casual style. And, in a strikingly new way, they treat the serious matter of the meaning of friendship in all its aspects.

In "El Dorado" undoubtedly the year's best western, incident, it gets better of the time and predicaments more gripping. The action plot turns over the fact that the teacher has three gunmen as great water rights from snakes.

The latest case the backbone teacher time to

SCAP—Robert Mitchell portrays Smith in "El Dorado" from citywide

relationships make when as if they are so sacred. For friendship—good, by extension, love itself—exists, people not only must be aware of its obligations but also are held to live up to them.

Yet Hawks takes these important considerations as well with laughter that some people have already strongly taken "El Dorado" as greatly when in truth it works as pure entertainment on one level and a modern morality play on another.

However, fast and forward it is entertainment, handsomely mounted and beautifully performed. It marks the fourth collaboration between Hawks and writer Leigh Brackett, who, besides "His Bravery" and "Hallelujah" wrote with William Faulkner the screenplay for "The Big Sleep."

Faulkner's Man
To make sure the movie had the rich emotional aura of Faulkner's original, Hawks persuaded his old friend, cinematographer Harold Rosson, to come out of retirement. As always, Rosson gives his best for Hawks and Ford, and Mitchell has rarely, if ever, given such an uncynical, direct performance. They are ably backed by Arthur Hunnicutt, who is a bit of a role model, and several other stars as sharp as ever, with Cecil a standout, followed by Charles Hall, Mitchell Carey, Christopher George and Anthony Rogers.

EL DORADO
A Western picture, set in the Arizona desert, it tells the story of a teacher who is forced to defend himself against three gunmen who are after him because of his knowledge of the location of a large deposit of gold. The teacher, played by Robert Mitchell, is a man of great courage and determination. He is aided by a young man, John Wayne, who is also a man of great courage and determination. The two men form a partnership that is tested in many ways. The picture is a classic Western, with all the elements of a good story. It is a must-see for anyone who likes Westerns.

But to John Wayne, who turns down the offer on the advice of his friend, another top gun who also happens to be the sheriff of El Dorado, Robert Mitchell.

The end of the cinematic excerpt when, after several months, Wayne runs into another criminal, a partner and his men, who are on their way to El Dorado to search for the gold. Wayne himself, who has just saved the life of James Cain, who killed one of those men who had killed his stepfather. From the film's point of view, Wayne is indebted to Cain for saving his life, and we now learn that Cain is the man who left James Cainson with a knife over some female who walked out on him.

There is not to mention a chain of obligations so to speak. Wayne must help out and rehabilitate Mitchell. Cain is indebted to Wayne, not as an actor, though generally everybody in the picture.

Looking, then, just beneath the ingratiating exterior of "El Dorado," the film's subtext up of Mitchell is a personal statement of the 1930s western drama's theme.

MERLE GINSBERG

The Rise and Rise
of L'Wren Scott

by Merle Ginsberg

Plus: Check out *Fashion Beast*, for more news on the latest runway shows, hot designers, and emerging trends.

In a rare interview, Mick Jagger's leading lady L'Wren Scott talks about how she went from towering fashion model to top celebrity stylist to one of Hollywood's favorite designers. By Merle Ginsberg.

For a gangly 5'4" Mormon girl growing up in Utah, finding an appropriate outfit is no easy task. But L'Wren Scott has always had a flair for fashion. The adopted child of a Mormon family, the former Luann Bembrough spent most of her teenage years poring over fashion magazines and dreaming of a career in Paris. In 1985, just after she turned 18, the frustrated future fashionista changed her name to something not quite so...regional, and set off for Paris. Since then, she's enjoyed relatively brief, but illustrious, careers as a model, a celebrity stylist, and costume designer. Never afraid of reinvention, in 2006, Scott decided to start her eponymous fashion label, and is quickly becoming one of the most celebrated fashion designers in the country. Yes, even in this economy.

Eric Charbonnet, VP / Getty Images

Mick loves what I wear, and always has something to say about it! Look at the way *he* dresses! I don't think there's a more fashion-conscious man in the world.

Soon after her arrival in the City of Light, the longest-legged lady that designers had ever seen quickly landed a succession of high-profile modeling gigs—for the Elys of Chanel and Thierry Mugler, as well as a notorious lingerie campaign with famed photographer Jean-Paul Goude—and became a familiar member of Paris' darlings. And she dressed the part—culled a glam wardrobe from vintage and thrift-store finds, she proved she had a flair for dressing her very vertical frame.

In 1994, King of Paris, Scott reinvented herself again, moving to Los Angeles to head up PR for Prada. A few years later, she morphed into the favored stylist of Herb Ritts, who contributed hundreds of celebrity photos to magazines such as *Vogue*, *New York* and *Vanity Fair*.

In an era when celebrity stylists have become stars in their own right, Scott wound up becoming the favored fashion mentor to some of the most stylish starlets of the '90s and early 2000s, including Nicole Kidman, Sarah Jessica Parker, Ellen Barkin (she designed her tight sexy sheaths for *Ocean's 13*), and Julianne Moore. Along the way, she was hired to costume-design a few films—*Marcy* (with Kim Basinger) and *Diabolique* (with Sharon Stone)—and worked on photo shoots with designers such as Karl Lagerfeld. Clearly, she also had a gift for meeting the right people—at the right time.

Come in point, Mick Jagger. In 2001, the two of them met on a photo shoot, and the rest is tall gorgeous woman's/short famous guy history. The pair has been together ever since, with Mick even thanking Scott "for not wearing heels" at the 2005 Golden Globes, when he won for the song "Old Habits Die Hard" from *Allie*. In 2007, Jagger left hotel life and bought a \$10 million house for himself and Scott in London, and she promptly threw herself into decorating. She's accompanied him everywhere over the last eight years, even creating his wardrobe for the Martin
