Comments for Public Posting: Please do not suspend normal approval procedures for LA28 construction. In their zeal, they may leave LA with developments that we will have to live with for the foreseeable future after the Olympic Games, which we were told were be no-build in nature. Thank you.

Comments for Public Posting: I oppose giving a free ride to zoning for the Olympics and beyond.
The proposal is too broad.

Comments for Public Posting: The proposed change contains loopholes that developers will rush in and fill. How will the city decide what is necessary for the Olympics and no more deregulated construction beyond that limit? The developers are salivating at the prospect of driving their Lambos through the loopholes. Please, do a better job and do so quickly. This proposal hasn't been given sufficient thought nor protections for permanent residents. Send it back. Thank you.

Comments for Public Posting: DO NOT allow any development and/or projects to be constructed without following existing requirements, plans or permits. Those requirements are in place because of careful consideration insuring the safety and health of the community. Requirements CANNOT be set aside for a temporary event such as the Olympics that would impact the community forever. Our city is reeling from the effects of the fires - we should focus our energy, time and money on rebuilding those communities.

Comments for Public Posting: I am opposed to allowing the Olympic committee total oversight on any project they deem related to the Olympics. The council needs to request a list of any proposed developments and their impacts and decide on a case by case basis. Providing a blanket approval does not protect communities from structures that will not serve the public in the long run.
