Comments for Public Posting: Add to Public Record As a resident of the City of Los Angeles Ladera in Westchester, I am writing to express my strong opposition to LA City Council File 15-0989-S47. This motion, if passed, would create a massive loophole allowing virtually any development claiming an Olympic or Paralympic connection to bypass essential land use regulations, including CEQA review, specific plans, conditional use permits, height limits, and other critical community safeguards. As currently written, LA City Council File 15-0989-S47 grants unchecked authority to developers and the private LA28 Organizing Committee, allowing them to override zoning and land use regulations without public oversight. The City must balance the short-term benefits of the Olympic Games with the need to protect the community and ensure that land use policies are consistent with broader community goals. As such, I support the position of the Ladera Heights Civic Association in its letter dated February 26, 2025. Sincerely, Treva Miller 63rd & Acacia St. Neighborhood Watch Captain

Comments for Public Posting: I object any new development in the Encino area, as it'll worsen people's lives by creating more traffic, air pollution, crime, noise. We don't want neighbors, who don't share our values. According to Socrates, as described in Plato's "Republic," the optimal size of a city would be one that is not so large that it becomes difficult to manage and maintain a sense of community and shared values; essentially, a city where everyone knows each other and can participate actively in civic life.

Comments for Public Posting: City council must reject this proposed exemption for 'Olympics related' gentrification projects and developments that only serve to further exacerbate inequality in our city. Focus on helping poor and working class Angelenos. Focus on re investing in new and healthy public housing. Cancel the Olympics.

Comments for Public Posting: I urge you to vote NO on the motion to exempt all Olympics-related development from city planning approval processes. This is wildly irresponsible and would be devastating for the community already in the areas of which these buildings are to be built in. Your focus should be on the communities already there and not for the people who will be temporarily here for the NOlympics.
