FORM GEN. 160

CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE

C.F. No. 15-0989
0150-12571-0001

Date: November 18, 2024

To: Honorable Members of the City Council

From: Matthew W. Szabo, City Administrative Officer

Sharon M. Tso, Chief Legislative Analyst

Subject: **FIRST AMENDMENT TO THE VENUE PLAN FOR THE 2028 OLYMPIC AND PARALYMPIC GAMES**

RECOMMENDATIONS

That the City Council:

1. Request the Los Angeles Organizing Committee for the Olympic and Paralympic Games 2028 (LA28) to submit a request to the City for consideration to amend the Venue Plan for the 2028 Olympic and Paralympic Games (2028 Games) to include detailed information regarding (i) each sports discipline to be relocated and (ii) each of the 14 sports disciplines with venue locations added subsequent to Council's approval of the Venue Plan on January 25, 2017;

2. Assert City authority to consider and approve all amendments to the Venue Plan;

3. Direct the City Administrative Officer and Chief Legislative Analyst, with assistance of the City Attorney, to continue analysis of the LA28 Venue Plan amendments; and

4. Request LA28 to conduct an independent economic impact study to highlight the anticipated impacts of the 2028 Olympic and Paralympic Games on the City and the region, which incorporates the proposed venue changes, added sport disciplines, and lessons learned from the 2024 Paris Games, and to submit the report to the City of Los Angeles no later than June 30, 2025.

SUMMARY

The City Council approved the current Venue Plan for the 2028 Games on January 25, 2017 (C.F. 15-0989-S2) as part of the candidature bid submission to the International Olympic Committee (IOC) to host the 2024 Olympic and Paralympic Games. The IOC subsequently awarded the City to be host of the 2028 Games. The Venue Plan includes the Olympic and Paralympic sports disciplines identified in 2017 and the venue location for each sports

discipline. The current Venue Plan is attached as Exhibits A-1 (sorted by sport) and A-2 (sorted by location).

Pursuant to Games Agreement C-139679 between the City and LA28, LA28 is required to obtain the City's consent prior to implementing actions that move events out of the City and amend the current Venue Plan approved by Council. The City maintains and asserts its rights to consider for approval all amendments to the Venue Plan such as:

- Relocating a sport discipline from a venue in the City to a venue out of the City;
- Relocating a sport discipline from in the current venue plan outside of the City to a new venue outside of the City;
- Relocating a sport discipline from a venue in the City to a new venue out of the City, and then subsequently to another venue out of the City; and
- Establishing the initial venue location of any sport discipline added after the Venue Plan was approved by Council.

LA28 continues to evaluate and negotiate venue agreements to achieve the best result for athletes, spectators, and participating jurisdictions, so efforts to finalize the Venue Plan continue. As a result, it is difficult for City staff to assess the impacts of the individual proposed venue changes provided by LA28 in June 2024 in isolation of the full, final venue plan that continues to develop.

VENUE PLAN AMENDMENTS

The original Venue Plan included in the City's Candidature application was developed with the intention of hosting the 2024 Olympic and Paralympic Games, which were subsequently awarded to Paris. At that time, however, the IOC also awarded the 2028 Games to Los Angeles. During the intervening years, additional considerations have led to re-evaluation of some proposed venues. In addition, the IOC has added additional sport disciplines to the 2028 Games sports program. The following provides a review of various revisions to the Venue Plan.

LA28 Proposal to Relocate Sport Disciplines to Venues Out of the City

LA28 states that new opportunities are available to increase revenue, lower expenses, mitigate risks, and reduce operational complexity to further support the 2028 Games. To realize the new opportunities, LA28 submitted a transmittal dated June 17, 2024 to request the City's approval of the First Amendment to the Venue Plan (Amended Venue Plan) authorizing the relocation of certain sport disciplines. Specifically, LA28 requests City approval to relocate nine Olympic sport disciplines and three Paralympic sport disciplines from venues in the City to venues out of the City. LA28 states that approval of the new venue locations will result in a total estimated net gain of $162 million in combined revenue increases and cost reductions. LA28's requested changes and the projected net gain for each sport are outlined in Table 1.

Aquatics (Swimming, Artistic Swimming, Para Swimming)
In the 2017 Venue Plan, Olympic and Paralympic Aquatics events are to be held within the City, at Dedeaux Field on the University of Southern California (USC) campus. USC subsequently announced a new project to develop Dedeaux Field and notified LA28 that the site is no longer available for Aquatics events. LA28 proposes the relocation of Aquatics Swimming events out of the City, into the Stadium in Inglewood; as well as the relocation of Aquatics Artistic Swimming and Para Swimming events out of the City, into a temporary water polo facility in the City of Long Beach.

Moving Aquatics events to venues out of the City is anticipated by LA28 to result in a $49 million net gain driven by a projected increase in ticketing revenue from significantly higher venue capacity and ticket pricing mix.

Table 1: Proposed Venue Changes Out of Los Angeles

Event	Sport	Discipline	Current location	Requested Location	Projected Gain
Olympics	Aquatics	Swimming	City of LA	Inglewood, CA	$49M
Olympics	Aquatics	Artistic Swimming	City of LA	Long Beach, CA	
Paralympics	Aquatics	Para Swimming	City of LA		
Olympics	Basketball	Finals	City of LA	Inglewood, CA	$44M
		Preliminaries	City of LA		
Olympics	Equestrian	Dressage	City of LA	Galway Downs (Temecula, CA)	$26M
Olympics	Equestrian	Eventing	City of LA		
Olympics	Equestrian	Jumping	City of LA		
Paralympics	Equestrian	Para Dressage	City of LA		
Olympics	Shooting	Shotgun	City of LA	Undetermined location	$11M
Olympics	Shooting	Target Shooting	City of LA		
Paralympics	Shooting	Para Sport	City of LA		
Olympics	Canoe	Slalom	City of LA	Oklahoma City, OK	$32M
				Total Projected Net Gain	**$162M**

Basketball (Finals, Preliminaries)
In the 2017 Venue Plan, Basketball events were scheduled to be held within the City, at Downtown Arena with certain preliminary games to be held in the Convention Center. The Amended Venue Plan proposes the relocation of Basketball events out of the City, into the Basketball Arena in Inglewood. LA28 notes that the Inglewood Arena is purpose-built for all Basketball events, which maintains the same seating, suites, and hospitality areas as Downtown Arena.

Moving Basketball events to the City to Inglewood is anticipated to result in a $44 million net benefit for the 2028 Games. This revenue adjustment is driven by higher projected ticketing revenue, as well as reduced estimated venue infrastructure expenses.

Equestrian (Dressage, Eventing, Jumping)
In the 2017 Venue Plan, Equestrian events were scheduled to be held within the City at the Sepulveda Basin. The Amended Venue Plan proposes the relocation of Equestrian events out of the City and into Galway Downs in Temecula, California. LA28 notes that IOC requirements

for Equestrian sites necessitate a single location for all three Equestrian disciplines, which could not be accommodated at the Sepulveda Basin or other sites located in the City such as Hansen Dam.

The original plan to locate Equestrian events in the Sepulveda Basin required construction of temporary facilities. Relocating the Equestrian sports disciplines to Galway Downs, a purpose built facility, will reduce venue costs by $24 million. In addition, LA28 estimates an increase in revenue of $2 million in ticket sales. As a result, relocating to Galway Downs is estimated to have a net benefit of $26 million.

Shooting (Shotgun, Target Shooting, Para Sport)
In the 2017 Venue Plan, Shooting events were scheduled to be held within the City at the Sepulveda Basin. The Amended Venue Plan proposes the relocation of Shooting events out of the City, to a currently undetermined location in Southern California. LA28 notes that relocation of Shooting events from the Sepulveda Basin would minimize the environmental impact of the event and result in a significant reduction of a temporary build for the events. LA28 has stated that they are considering two locations within Southern California, neither within the City.

Moving Shooting events from a temporary venue in the City to a purpose-built location in Southern California is anticipated to result in an $11 million reduction in the estimated venue infrastructure cost. The estimated ticket sales revenue is expected to remain unchanged. The result is an estimated $11 million net benefit.

Although the anticipated savings are beneficial to the Games budget, staff are unable to fully evaluate the impacts of such a move. Additional information is needed, including details concerning the final venue location, before a recommendation concerning this venue change can be provided.

Canoe (Slalom)
In the 2017 Venue Plan, Canoe Slalom events were scheduled to be held within the City at the Sepulveda Basin. The Amended Venue Plan proposes the relocation of Canoe Slalom events out of the City and to Oklahoma City (OKC), Oklahoma. LA28 notes that neither the City nor adjacent areas possess a permanent venue that could adequately host Canoe Slalom events during the 2028 Games. Had the sport remained in Los Angeles, it would have required significant capital expenditures to build a temporary venue. A purpose-built facility exists in OKC, which served as host of the 2024 U.S. Olympic Team Trials and will host the 2026 Canoe Slalom World Championships.

Moving Canoe Slalom events from the City to OKC is anticipated to lower costs by roughly $39 million, while also lowering revenue by roughly $6 million, resulting in a $32 million boost to net benefit for the 2028 Games. This adjustment is driven by reducing estimated venue infrastructure and Games operations expenses due to OKC's existing facilities, partially offset by the reduction of projected ticketing and ancillary event revenues.

LA28 has provided the City with limited information regarding arrangements it has developed with the private non-profit Greater Oklahoma City Chamber, including general terms related to revenue and expense guarantees, as well as potential revenue sharing, for relocating the Canoe Slalom sports discipline, along with the locating Softball sports discipline, in OKC. The

City has yet to receive or review copies of the agreement with OKC from LA28 regarding these arrangements, guarantees, or revenue sharing terms. As a result, the City is not able to verify the details of the LA28-OKC arrangements. However, the OKC Chamber of Commerce did provide a letter dated June 13, 2024 (included in LA28's transmittal; Exhibit C) asserting that if the City and LA28 agree to locate Slalom Canoe and Softball (discussed below) in OKC, there will be no obligation to provide any risk mitigation or reimbursement to OKC for these events.

The City has fiduciary interest in all financial impacts, risks, and opportunities associated with the proposed venue changes including the arrangements with the Greater Oklahoma City Chamber. City access to the agreements and arrangements for Slalom Canoe and Softball, are necessary to complete our review of the requested venue changes to OKC.

LA28 Proposal to Relocate Sport Disciplines to Venues in the City

LA28 also indicates that it will relocate certain sports disciplines from venues outside the City to venues in the City including Gymnastics moving to the Downtown Arena (replacing Basketball) and Cycling BMX Racing and Archery moving to the Sepulveda Basin sports complex. However, these tentative changes are subject to the relocation of other sports disciplines described in this report. Further, details concerning the Sepulveda Basin Sports Complex are subject to a separate Venue Use Agreement between LA28 and the Department of Recreation and Parks, which is currently being negotiated. The sports disciplines identified to relocate into the City, the tentative locations, and projected financial impacts of the change are outlined in Table 2.

Table 2
Proposed Venue Changes Into Los Angeles

Event	Sport	Discipline	Current location	Tentative location	Projected Gain/(Loss)
Olympics	Gymnastics	Artistic	Inglewood, CA	Los Angeles, CA	($6M)
Olympics	Gymnastics	Rhythmic	Inglewood, CA	Los Angeles, CA	
Olympics	Gymnastics	Trampoline	Inglewood, CA	Los Angeles, CA	
Olympics	Archery	Recurve	Inglewood, CA	Los Angeles, CA	*
Olympics	Archery	Para Archery	Inglewood, CA	Los Angeles, CA	*
Olympics	Cycling	BMX Racing	Long Beach, CA	Los Angeles, CA	*
				Total Projected Net Gain / (Loss)	**($6M)***

* Financial information was not provided for changes to BMX Racing, Archery, or Para Archery

Gymnastics (Artistic, Rhythmic, Trampoline)

In the 2017 Venue Plan, Gymnastics events were scheduled to be held outside of the City, at the Forum in Inglewood. LA28 notes that the Forum has 3,300 less seats than the Downtown Arena, does not include suites, and lacks a warm-up area for gymnasts. The Amended Venue Plan proposes the relocation of Gymnastics events into the City at the Downtown Arena with warm-up areas in the Los Angeles Convention Center. Moving Gymnastics into the Downtown Arena would necessitate the relocation of Basketball, which was set for the Downtown Arena in the 2017 Venue Plan. The relocation of Basketball is proposed for Inglewood, as noted above.

Moving Gymnastics events from Inglewood to the City is anticipated to result in a net cost of $6 million for the 2028 Games, with a revenue increase of $8M and an increase in expenditures of $14M.

Archery (Recurve, Para Archery)
In the 2017 Venue Plan, Archery events were scheduled to be held outside of the City, at the Inglewood Stadium. The Amended Venue Plan proposes the relocation of Archery events into the City at the Sepulveda Basin. LA28 has not indicated the fiscal impacts of moving Archery events from Inglewood to the City.

BMX (Racing)
In the 2017 Venue Plan, BMX Racing events were scheduled to be held outside of the City, at a BMX facility in Long Beach. The Amended Venue Plan proposes the relocation of BMX Racing events into the City at the Sepulveda Basin. The relocation would be made in tandem with the location of BMX Freestyle, a newly added sport discipline, at the Sepulveda Basin. LA28 has not indicated the fiscal impacts of moving BMX Racing events from Long Beach to the City.

Sports Disciplines Added After Council Approval of the 2017 Venue Plan
In addition to LA28's requested venue changes above, the International Olympic Committee (IOC) added a total of 14 sports disciplines to the 2028 Games, consisting of 13 Olympic sport disciplines and one Paralympic sport discipline, which are not identified in the current Venue Plan approved by Council in 2017 (Table 3). LA28 has announced that three sports will be located in Los Angeles, in the Sepulveda Basin Sports Park. The other sport disciplines are not included in the LA28 transmittal for Council consideration, although there have been news reports regarding a few of these remaining sports disciplines.

Table 3
Sport Disciplines Added to the Sports Program

Event	Sport	Discipline	Current location	Tentative location
Olympics	Baseball	Baseball	N/A	TBD
Olympics	Basketball	3x3	N/A	TBD
Olympics	Cycling	BMX Freestyle	N/A	Sepulveda Basin
Olympics	Flag Football	Flag Football	N/A	TBD
Olympics	Lacrosse	Lacrosse	N/A	TBD
Olympics	Skateboarding	Park	N/A	Sepulveda Basin
Olympics	Skateboarding	Street	N/A	Sepulveda Basin
Olympics	Sport Climbing	Sport Climbing	N/A	TBD
Olympics	Rowing	Coastal	N/A	TBD
Olympics	Softball	Softball	N/A	Oklahoma City, OK
Olympics	Surfing	Surfing	N/A	TBD
Olympics	Squash	Squash	N/A	TBD
Olympics	Cricket	Cricket	N/A	TBD
Paralympics	Para Climbing	Para Climbing	N/A	TBD

N/A - Sport discipline was added to the 2028 Games after the bid venue plan was approved.

LA28 provided limited information concerning the 14 sports disciplines added to the 2028 Games. A recommendation is included in this report to request LA28 submit a Venue Plan amendment request for Council consideration that includes each of the 14 additional sports disciplines identified in Table 3 and identifies each proposed venue location.

- **Cycling – BMX Freestyle**. LA28 has announced that the Cycling – BMX Freestyle discipline would be held at the Sepulveda Basin Sports Park. No data have been provided concerning venue costs or estimated ticket revenues.

- **Skateboarding.** LA28 has announced that Skateboarding events are proposed to be held in the Sepulveda Basin Sports Complex. No data have been provided concerning venue costs or estimated ticket revenues.

- **Softball.** Softball has been added to the 2028 Games program subsequent to Council's approval of the 2017 Venue Plan. The Amended Venue Plan proposes the location of Softball in OKC due to the pre-existing facilities in the area such as Devon Park, a 13,000 capacity purpose-built Softball stadium. LA28 has not indicated the economic impacts of locating Softball events in OKC.

- **Cricket.** News entities report that LA28 is considering locating Cricket in a venue in New York. An international cricket competition was recently held in New York in a temporary venue. LA28 reports that they are reviewing local opportunities to host Cricket. A permanent venue is being planned to be located in the City of Irvine, where the Los Angeles Knight Riders, a professional Cricket team, would be based. It is unknown whether that venue, or any other Los Angeles regional venue, will be available for the 2028 Games.

  Reports indicate that significant broadcast revenues could be generated by targeting the timing of cricket matches during prime viewing times in India and Pakistan, where the sport is particularly popular. As such, this would result in an 11 a.m. match in New York or an 8 a.m. match in Los Angeles. Hosting Cricket in Los Angeles with late morning or afternoon matches may reduce broadcast revenues according to news reports.

  LA28 has not provided the City with information concerning the options for Cricket venues.

FINANCIAL ANALYSIS OF THE REQUESTED CHANGES

According to LA28, the net financial impact of these proposed venue changes is projected to be a net gain of $162 million in combined revenue increases and cost reductions. This projected net gain reflects 2.35% of the current 2028 Games Budget of $6.884 billion. Projected overall revenue improvements ($108 million) are driven by an increase in ticketing revenue from larger venues and higher ticket values. Projected overall cost reductions ($54 million) are primarily driven by lower stadium overlay expenditures and venue operation costs offset by higher venue operation costs for Aquatics. An independent third-party review of the proposed venue changes was not performed to validate the LA28 financial projections for reasonableness, nor were the economic impact of these changes on the Los Angeles region. LA28 does state however that the proposed changes were reviewed and approved by entities associated with the 2028 Games, including the International Olympic Committee (IOC),

International Federations, Olympic Broadcasting Services, and the United States Olympic and Paralympic Committee. LA28's consultant (AECOM) also led reviews of architecture and engineering and tested pricing methodologies by validating costs.

The 2017 Venue Plan estimated an overall ticket capacity of 8,442,988; of these tickets, it was estimated that 38% would be sold for events within the City and 62%, would be sold for events outside of the City. The Amended Venue Plan estimates an overall ticket capacity of 33% will be sold for events within the City and 67% will be sold for events outside of the City. These updated figures increase the total number of tickets at City events while lowering the percentage of City events by 5%.

A number of tickets are anticipated to be sold outside of the State of California in the Amended Venue Plan. LA28 notes that a number of these tickets are expected to be sold in Oklahoma if Council were to approve the relocation of Canoe Slalom and the location of Softball to OKC. The remaining tickets are designated for the Football preliminary matches, which are anticipated to be held in regions across the United States. Holding these preliminaries across the country is consistent with the adopted 2017 Venue Plan and the practice for the 1984 Olympic Games.

An additional number of tickets cannot be assigned to a geographic location as venues for newly added sports shown in Table 3 have not been determined. Many of these sports disciplines are expected to be located in the City, increasing the total number of tickets to be sold in the City.

ECONOMIC IMPACT STUDY

A current economic impact study that provides independent analysis of LA28's requested venue changes on the City and the Los Angeles-region has not been performed by LA28. As a result, the anticipated economic impacts to the local and regional economies resulting from the LA28 request are uncertain. However, venue changes occurring locally between the City and adjacent municipalities are anticipated to generate a similar economic impact for the City and local region as tourists and local visitors may utilize the same transportation, lodging, restaurants, personal services, and tourist destinations. LA28 indicates that they are contracting to complete a new economic impact study which is anticipated to be completed in 2025. A recommendation is provided for Council to request for LA28 to conduct an independent economic impact study to highlight the anticipated impacts of the 2028 Games on the City and the region, which incorporates the requested venue changes, added sport disciplines, and lessons learned from the 2024 Paris Games, and to submit the report to the City no later than June 30, 2025.

CONCLUSION

Based on the City's review of the LA28 request and in consideration of the available information at this time, the recommendations in this report seek additional information from LA28 to provide a complete venue proposal for the 2028 Games prior to approval.

FISCAL IMPACT STATEMENT
There is no fiscal impact resulting from the recommendation in this report.

FINANCIAL POLICIES STATEMENT
Approval of the recommendations in this report comply with the City's Financial Policies as there is no fiscal impact resulting from the recommendations.

Dear Mayor Bass, Council President Krekorian, Chair Park, City Attorney Feldstein Soto, City Administrative Officer Szabo, Chief Legislative Analyst Tso, and City Clerk Wolcott:

Pursuant to section 6.6 of the Games Agreement made and entered by and among the City of Los Angeles and the Los Angeles Organizing Committee for the Olympic and Paralympic Games 2028 ["LA28"], please find attached as Appendices A-D: LA28's request for the City's written consent of amendments to the venue plan submitted to the City on January 18, 2017 that move several competition events outside of the City of Los Angeles.

Sincerely,

CASEY WASSERMAN
Chairperson/President, LA28

APPENDIX A

2028 Venue Plan

I. Overview

In the summer of 2028, in addition to welcoming the world's top athletes to compete on the biggest stage in sports, the Olympic and Paralympic Games will be a celebration of the people and communities of Los Angeles.

Los Angeles, and neighboring cities, collectively have an abundance of world-class professional sports and collegiate stadiums and arenas. These existing venues provide the strongest possible foundation for successful and fiscally responsible Games.

When bidding to host the Games in 2017, LA28 submitted a venue plan to the City of Los Angeles and the International Olympic Committee (IOC). This Bid Venue Plan included the proposed competition venues for the sports and disciplines featured in the Rio 2016 and what was then known of the Tokyo 2020 Olympic and Paralympic Games editions as the 2028 sport program was not yet determined, along with proposed placements for athlete housing, media housing, broadcasting and press facilities.

Since 2017, the Los Angeles venue landscape has changed, with new professional sports stadiums built or under construction, and previously assigned venues no longer available for use in 2028. Additionally, new sports have been added to the 2028 Olympic and Paralympic sports program, requiring LA28 to assign additional competition venues for the Games. Finally, new International Olympic Committee (IOC) policy, the Olympic Agenda 2020+5, urges organizing committees to reduce the complexity and cost of the Games, including making use of existing facilities that may be outside the region of the host city.

These developments give LA28 an opportunity to adjust and improve its venue plan, first and foremost, by creating greater cost certainty and reducing financial risk. **The new venue assignments will create more than $150 million in combined cost savings and revenue increases, with each new venue assignment achieving at least $10 million in cost savings and/or revenue increases.** Additionally, the updated venue plan will use more existing venues and fewer temporary venues, making the Games more sustainable, and offers a proven and unparalleled experience to athletes and attendees.

In the updated venue plan, the City of Los Angeles retains its position as the primary host of the Games in 2028. Notably, one of the most popular sports, Gymnastics, is reassigned to a venue located within the City. LA28 also reaffirms its commitment to place sports in the San Fernando Valley for the first time in history, adding several youthful action sports. Furthermore, in the full and complete plan, which will be

Financial data presented as rounded in USD $millions

announced in the months ahead, it is expected that more sports will be added to venues located within the City than elsewhere.

Nonetheless, there are more Olympic and Paralympic sports than there are venues within City boundaries, requiring LA28 to assign sports in venues located outside the City, as did the 1932 and 1984 Games. LA28 will continue to consider assigning sports to venues located within City boundaries, while taking into account specific sport and venue delivery requirements of the IOC, along with cost, complexity, and operational needs that may compel LA28 to assign sports to venues located outside City boundaries.

This document serves as LA28's submission to the City of Los Angeles for written consent of changes to venue assignments that move competitions out of the City. According to the terms of the Games Agreement, the City cannot unreasonably withhold, condition, or delay its consent.

The City's approval is not required for LA28 to move sports into venues located in the City of Los Angeles, or for other venue assignments outside of the City of Los Angeles.

*Moving out of the City of Los Angeles – **requires City approval***

- Aquatics (Olympic) - Swimming, Artistic Swimming (Paralympic) - Para Swimming
- Basketball (Olympic)
- Canoe Slalom (Olympic)
- Equestrian (Olympic) - Dressage, Eventing, Jumping (Paralympic) - Para Dressage
- Shooting (Olympic) Shotgun, Target Shooting (Paralympic) Shooting Para Sport

Moving into the City of Los Angeles – does not require City approval

- Aquatics (Olympic) - Diving (venue change within City)
- Archery (Olympic & Paralympic)
- Cycling (Olympic) - BMX Freestyle, BMX Racing
- Gymnastics (Olympic) – Artistic, Rhythmic, Trampoline
- Skateboarding (Olympic) – Park, Street

LA28 will make future announcements about these and other 2028 Venue Plan changes after the International Federations of each sport and the IOC Executive Board and International Paralympic Committee (IPC) Governing Board reviews and approves updated venue assignments.

LA28's venue changes contained in this document will mutually benefit the Games and the City of Los Angeles. In addition to offering economic benefits, greater

sustainability and operational improvements for athletes, attendees and workers, the updated Venue Plan will embrace and benefit our City even more than the Bid Venue Plan that was submitted in 2017.

Economic Benefits

LA28's updated venue plan would achieve an estimated $156 million in combined revenue increases and cost savings, primarily through increased ticketing, lower stadium overlay expenditures and venue operations improvements. Overall, these changes will improve the venue plan's cost certainty and further reduce the risk of cost overruns.

Operational Benefits

By placing more sports in existing facilities, rather than temporary facilities, the 2028 Venue Plan will leverage existing services that will facilitate more efficient venue operations, improve the field of play for competitions, and provide athletes, workers and attendees with an unparalleled Games experience.

Sustainability

These venues changes will switch three sports from temporary venues to existing venues. By constructing fewer temporary venues, LA28 will rely even more on its "radical reuse" concept and will further reduce the Games' material use.

Number of Sports in the City of Los Angeles Unchanged

While the number of sports in the City of Los Angeles will remain unchanged with these updated venue assignments, it is anticipated that several new sports will also be located in Los Angeles, with announcements in the future. Ultimately, we expect that there will be more sports in the City of Los Angeles in the final and complete 2028 Venue Plan as compared to the Bid Venue Plan.

The cumulative benefits outlined in this document are contingent on the City's approval of all relevant venue changes under its purview, per the terms of the Games Agreement.

Below, LA28 will provide details about how each change of venue from inside to outside the City of Los Angeles offers an improvement over what was proposed in the Bid Venue Plan, and how altogether these changes generate greater cumulative benefits for the Games and City of Los Angeles.

Please note, per current IOC guidelines, LA28 will not use existing corporate names for stadiums and arenas for Games purposes.

APPENDIX B

Venue Moves

I. Gymnastics and Basketball:

Gymnastics is amongst the most followed Olympic sports for American fans and the highest-rated for domestic television audiences. In the 2028 Venue Plan, LA28 will move Gymnastics and its three (3) disciplines from the Forum in Inglewood, CA to the Arena in Downtown Los Angeles that is the home to the Lakers, Kings and Sparks.

The Arena in Downtown Los Angeles provides an optimal field of play for Gymnastics. The venue has a larger floor space that is better suited for all the field of play requirements and apparatuses used in the Gymnastics competitions and its various disciplines, compared to the Forum in Inglewood, CA.

Also, the required warm-up area for gymnasts can be better accommodated at the LA Convention Center, adjacent to the Arena in Downtown Los Angeles. At the Forum, a temporary facility would need to be constructed in the parking lot for warm-up.

The Arena in Downtown Los Angeles offers more seats with more hospitality facilities for more spectators to watch one of the marquee sports of the Games. Gymnastics will go from having no suites at the Forum, to gaining an increased capacity of 3,300 per session provided by the more than 150 suites at the Arena in Downtown Los Angeles.

In order to make this move possible, Basketball would move to the new Arena in Inglewood, CA that will be the home of the Clippers. Basketball was previously assigned to the Arena in Downtown Los Angeles in the Bid Venue Plan.

The Arena in Inglewood, CA is specifically built for Basketball and has a smaller floor space than the Arena in Downtown Los Angeles. It offers just as many seats, suites and hospitality areas as Arena in Downtown Los Angeles and would be the ideal home for the Olympic Basketball competition.

Net Estimated Change Better / (Worse)

	Gymnastics Venue Change	Basketball Venue Change	**Total Move**
Revenue	$8M	$15M	$24M
Expense	$(14M)	$28M	$14M
Net Rev/Exp	$(6M)	$44M	**$38M**

All values are based on estimates for ticketing revenue, infrastructure cost and venue operations management cost.

These venue adjustments result in an estimated **net benefit of +$38 million**, due to higher projected ticketing revenue from increased overall capacity for Basketball (including preliminary and final competitions) and improvements in ticketing mix for

Gymnastics. Net projected cost reductions are primarily driven by reduced venue infrastructure expenses estimated for Basketball.

To achieve the significant financial and operational improvements in the 2028 Venue Plan noted above, LA28 seeks the City's written consent to move Basketball out of a venue located in the City of Los Angeles.

II. Sepulveda Basin:

The 2028 Venue Plan, similar to the Bid Venue Plan, reaffirms LA28's commitment to bring the Games to the San Fernando Valley. The previously assigned sports of Canoe Slalom, Equestrian, and Shooting will be relocated to existing venues outside of Los Angeles, achieving significant cost savings by eliminating the need to construct expensive, entirely temporary venues for those sports.

In the updated plan, the Sepulveda Basin plans to host Archery, Cycling – BMX, and Skateboarding, which, when grouped together, will create a compelling, cohesive and high-energy atmosphere.

Archery and Para Archery were previously set to take place in Inglewood.

Moving Cycling – BMX Racing, which was previously assigned to Long Beach, to the Sepulveda Dam Recreation Area allows for it to be paired alongside new sports and disciplines added by the IOC for the LA28 Games, namely Cycling – BMX Freestyle, Skateboarding – Park, and Skateboarding – Street.

To bring this vision to life, LA28's updated venue plan will move the three sports previously set in the Sepulveda Dam Recreation Area, Canoe Slalom, Equestrian, and Shooting, to existing, purpose-built facilities outside the City of Los Angeles to reduce costs.

a. Canoe Slalom

The new IOC Agenda 2020+5 policy encourages Olympic organizing committees like LA28 to make use of existing facilities that may be outside the region of a Host City to reduce the cost and complexity of the Games. For example, the Paris 2024 Games will have Shooting in Chateauroux (167 miles from Paris) and Sailing in Marseille (481 miles from Paris).

With that goal in mind, and without an existing Canoe Slalom venue in Southern California, LA28 reviewed several Canoe Slalom venues across the country. In an effort to use an existing facility and reduce costs, LA28 identified an unmatched opportunity in Oklahoma City's existing world-class venue with fit for purpose facilities used for international Canoe Slalom competitions. This Canoe Slalom venue is preferred by the International Federation and is currently slated as the site for

several international races leading up to 2028, including the 2024 U.S. Olympic Team Trials and the 2026 Canoe Slalom World Championships.

This change is rooted in creating the best experience for athletes and fans, with sustainability and fiscal responsibility at its core. The most sustainable venue is the one you don't have to build, and Oklahoma City has the existing infrastructure and operational benefits that ensures athletes have a premier field of play.

Had Canoe Slalom remained in Los Angeles, it would have required significant capital expenditures to build a temporary venue, costing at least twice as much as Oklahoma City. Shifting delivery responsibilities to an Oklahoma City entity removes more costs and eliminates financial risk associated with this event from the Games Budget. See Appendix D for a letter from the Oklahoma City Chamber of Commerce affirming the assumption of risk by Oklahoma City.

Net Estimated Change Better / (Worse)

	Canoe Slalom Venue Change
Revenue	$(6M)
Expense	$39M
Net Rev/Exp	**$32M**

All values are based on estimates for ticketing revenue, infrastructure cost, venue operations management cost and Games operations cost.

These venue adjustments result in an estimated **net benefit of +$32 million**, driven by reducing estimated venue infrastructure and Games operations expenses, partially offset by removal of projected ticketing and ancillary event revenues.

b. Equestrian:

In the 2028 Venue Plan, the Equestrian venue is Galway Downs in Temecula, CA. LA28 considered many possible venues, but the IOC requirement that all three Equestrian disciplines (Jumping, Dressage, Eventing) be organized within the same site rendered many venues unfit, particularly for the Cross Country component of Eventing.

One of the venues examined was the Hansen Dam Horse Park in Lake View Terrace; however, it lacks adequate space and facilities to accommodate the Olympic and Paralympic Equestrian requirements. Additionally, the current operation and resident horses would need to be displaced throughout the build and Games period given restrictive quarantine and build requirements. The IOC requirement that all three Equestrian disciplines be delivered on the same site to manage the cost and complexity of the Equestrian program rules out Hansen Dam.

The only existing venue that can accommodate the requirements of Equestrian, while also reducing the cost and complexity of delivery, is Galway Downs.

Net Estimate Change Better / (Worse)

	Equestrian Venue Change
Revenue	$2M
Expense	$24M
Net Rev/Exp	**$26M**

All values are based on estimates for ticketing revenue, infrastructure cost and venue operations management cost.

These venue adjustments result in an estimated **net benefit of +$26 million**, primarily driven by the significant reduction in estimated venue infrastructure expense.

In comparison to building an entirely temporary facility at Sepulveda Dam, the existing facilities at Galway Downs can accommodate Equestrian at a much lower cost, and its operator is experienced in hosting large events.

c. Shooting:

In the Bid Venue Plan, Shooting was to be staged in the Sepulveda Basin Sports Complex using a fully temporary venue. LA28 has found two possible existing facilities that can be leveraged to host Shotgun events that would minimize the environmental impact (e.g. no dispersion of lead pellets) and result in a significant reduction of the temporary build.

Moving this sport, consisting of two disciplines, to either of the possible existing facilities located in Southern California, would drive significant cost savings. LA28 has not yet decided on which of the two possible facilities to use at this time, but the economic and operational advantages at each would be similar.

Net Estimate Change Better / (Worse)

	Shooting Venue Change
Revenue	-
Expense	$11M
Net Rev/Exp*	**$11M**

All values are based on estimates for ticketing revenue, infrastructure cost and venue operations management cost.

These venue adjustments result in an estimated **net benefit of +$11 million**, primarily driven by significant reduction in estimated venue infrastructure cost.

LA28 requests the City's written consent to move Canoe Slalom, Equestrian and Shooting outside the City of Los Angeles to existing, purpose-built facilities that would achieve significant cost savings. This move will create the opportunity for several youthful and high energy sports/disciplines to take their place.

III. Aquatics:

In the Bid Venue Plan, Swimming, Diving, Artistic Swimming, and Para-Swimming were assigned to a temporary stadium to be built at the Dedeaux Baseball field on USC's campus. Following USC's decision to make significant investments into their athletics facilities, including an upgraded Baseball stadium at Dedeaux Field, this site will no longer be available for the 2028 Games.

Instead of building another entirely temporary stadium for these Aquatics sports elsewhere, the updated venue plan places these sports in several venues that will create unparalleled experiences for the athletes and attendees, while generating significant revenue opportunities to support the Games.

a. *Swimming*

While the initially proposed site at USC is no longer available, the Stadium in Inglewood, CA that is the home of the Rams and Chargers is, and it will become the largest swimming venue in Olympic history. Swimming will gain about 18,000 additional seats, for a total of approximately 38,000 seats, in addition to 125 suites which were not available at the temporary venue in the Bid Venue Plan and generate the largest revenue increase of any venue change for 2028. A larger seating capacity also means that more spectators would have the opportunity to attend one of the marquee Olympic events. This move also benefits the athletes' field of play which will now allow the warmup pool to be a short walk to the competition pool, whereas the initial plans at Dedeaux Field would have required a substantial distance between the two. Given the unmatched opportunity, operational benefits, and improved athlete experience, LA28 is compelled to move Olympic Swimming to the Stadium in Inglewood, CA.

b. *Artistic Swimming and Para-Swimming*

Artistic Swimming and Para-Swimming will share the Water Polo venue in Long Beach. In the Bid Venue Plan, Water Polo was set to take place in Long Beach. With the need to find an alternative to Dedeaux Field, LA28 identified an opportunity to cluster more Aquatics disciplines together to create a greater athlete and fan experience at an already planned Aquatics facility.

c. *Diving*

Diving will remain in the City of Los Angeles but move to the 1932 Pool in Exposition Park, adjacent to the Coliseum. LA28 will renovate the pool and diving well to the highest International Federation standard and provide this upgraded facility as a lasting legacy for the City of Los Angeles Department of Recreation and Parks. With LA28's renovation, the stadium will continue its rich Olympic history as a competition venue for the 1932 and now the 2028 Games.

Net Estimated Change Better / (Worse)

	Aquatics Venue Changes
Revenue*	$106M
Expense*	$(58M)
Net Rev/Exp*	**$49M**

These venue adjustments result in an estimated **net benefit of +$49 million**, driven by a net projected increase in ticketing revenue from increased overall capacity and improvements in the ticketing mix. This is partially offset by net projected increases in estimated venue infrastructure and venue management costs as required to achieve ticketing benefits.

To achieve these significant financial and operational improvements in the 2028 Venue Plan noted above, LA28 seeks the City's written consent to move several Aquatics disciplines out of a venue located in the City of Los Angeles.

Appendix C

Estimated Economic Impacts

Gymnastics and Basketball

Better / [Worse]

	Gymnastics Venue Change	Basketball Venue Change	**Total Move**
Revenue	$8M	$15M	$24M
Expense	$[14M]	$28M	$14M
Net Rev/Exp	$[6M]	$44M	**$38M**

All values are based on estimates for ticketing revenue, infrastructure cost and venue operations management cost.

Canoe Slalom

Better / [Worse]

	Canoe Slalom Venue Change
Revenue	$[6M]
Expense	$39M
Net Rev/Exp	**$32M**

All values are based on estimates for ticketing revenue, infrastructure cost, venue operations management cost and Games operations cost.

RE: Greater Oklahoma City Chamber of Commerce Guarantee Related to the 2028 Olympic and Paralympic Games

Dear Mayor Bass, Council President Krekorian, Ad Hoc Committee Chair Park, City Attorney Feldstein Soto, City Administrative Officer Szabo, and Chief Legislative Analyst Tso:

The Greater Oklahoma City Chamber of Commerce, Inc. (the "Chamber") is pleased to support the City of Los Angeles as host of the 2028 Olympic and Paralympic Games (the "Games"). The Chamber shares with the City of Los Angeles and the Los Angeles Organizing Committee for the Olympic and Paralympic Games 2028 ("LA28") the desire that the Games be organized in the best possible manner and take place under the most favorable conditions for the benefit of the City of Los Angeles and other relevant stakeholders.

The Chamber hereby represents and confirms to the City of Los Angeles that it has signed a legally binding agreement in connection with LA28's proposal to assign Softball and Canoe Slalom competitions in venues located in the City of Oklahoma City. The agreement provides that (a) the Chamber shall assume all financial risk associated with hosting the Canoe Slalom and Softball competitions for the Games and (b) the Chamber understands that any financial backstop, guarantee, or contingency provided or required by the City of

Los Angeles and/or the State of California for the Games shall not apply to the Chamber, the City of Oklahoma City, or any other applicable venue, organization, local, regional, state government, or private institution supporting the delivery of Canoe Slalom and/or Softball in the City of Oklahoma City. These terms, together with the other terms of the August 18, 2023 agreement, will be incorporated into a long-form agreement to be entered into by LA28 and the Chamber upon confirmation that the Softball and Canoe Slalom competitions will take place in the City of Oklahoma City.

The Chamber also agrees to take all appropriate measures in an endeavor to assist the City of Los Angeles and LA28 in completely fulfilling their obligations under the Host City Contract and other relevant agreements with the International Olympic Committee ("IOC") with respect to Games events and activities that will take place in the City of Oklahoma City.

The Chamber looks forward to supporting the City of Los Angeles as Host City and LA28 to successfully deliver the competitions of Canoe Slalom and Softball in the City of Oklahoma City.

Sincerely,

THE GREATER OKLAHOMA CITY CHAMBER OF COMMERCE, INC.
