Determination (To be completed by Lead Agency)**On the basis of this initial evaluation:**

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions on the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Evaluation of Environmental Impacts:

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants based on a project-specific screening analysis).
2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
4. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of a mitigation measure has reduced an effect from "Potentially Significant Impact" to "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly

explain how they reduce the effect to a less than significant level (mitigation measures from “Earlier Analysis,” as described in (5) below, may be cross referenced).

5. Earlier analysis must be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR, or negative declaration. Section 15063 (c)(3)(D). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. Mitigation Measures. For effects that are “Less Than Significant With Mitigation Measures Incorporated,” describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated
7. Supporting Information Sources: A sources list should be attached, and other sources used or individuals contacted should be cited in the discussion.
8. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project’s environmental effects in whichever format is selected.
9. The explanation of each issue should identify:
 - a. The significance criteria or threshold, if any, used to evaluate each question; and
 - b. The mitigation measure identified, if any, to reduce the impact to less than significant.

Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a “Potentially Significant Impact” as indicated by the checklist on the following pages.

DISCUSSION OF THE ENVIRONMENTAL EVALUATION (Attach additional sheets if necessary)

The Environmental Impact Assessment includes the use of official City of Los Angeles and other government source reference materials related to various environmental impact categories (e.g., Hydrology, Air Quality, Biology, Cultural Resources, etc.). The State of California, Department of Conservation, Division of Mines and Geology – Seismic Hazard Maps and reports, are used to identify potential future significant seismic events; including probable magnitudes, liquefaction, and landslide hazards. Based on Applicant information provided in the Master Land Use Application and Environmental Assessment Form, impact evaluations were based on stated facts contained therein, including but not limited to, reference materials indicated above, field investigation of the project site, and other reliable reference materials known at the time.

Project specific impacts were evaluated based on all relevant facts indicated in the Environmental Assessment Form and expressed through the Applicant's project description and supportive materials. Both the Initial Study Checklist and Checklist Explanations, in conjunction with the City of Los Angeles's Adopted Thresholds Guide and CEQA Guidelines, were used to reach reasonable conclusions on environmental impacts as mandated under the California Environmental Quality Act (CEQA).

The project as identified in the project description may cause potentially significant impacts on the environment without mitigation. Therefore, this environmental analysis concludes that a Mitigated Negative Declaration shall be issued to avoid and mitigate all potential adverse impacts on the environment by the imposition of mitigation measures and/or conditions contained and expressed in this document; the environmental case file known as **ENV-2015-2895-MND** and the associated case(s), **CPC 2015-2893-VZC-HD-CUB-SPR**. Finally, based on the fact that these impacts can be feasibly mitigated to less than significant, and based on the findings and thresholds for Mandatory Findings of Significance as described in the California Environmental Quality Act, section 15065, the overall project impacts(s) on the environment (after mitigation) will not:

- Substantially degrade environmental quality.
- Substantially reduce fish or wildlife habitat.
- Cause a fish or wildlife habitat to drop below self sustaining levels.
- Threaten to eliminate a plant or animal community.
- Reduce number, or restrict range of a rare, threatened, or endangered species.
- Eliminate important examples of major periods of California history or prehistory.
- Achieve short-term goals to the disadvantage of long-term goals.
- Result in environmental effects that are individually limited but cumulatively considerable.
- Result in environmental effects that will cause substantial adverse effects on human beings.

SUMMARY OF MITIGATION MEASURES

AESTHETICS

No mitigation measures are required.

AGRICULTURE AND FORESTRY RESOURCES

No mitigation measures are required.

AIR QUALITY

No mitigation measures are required.

BIOLOGICAL RESOURCES

BIO-1 Tree Removal (Public Right-of-Way)

- Removal of trees in the public right-of-way requires approval by the Board of Public Works. The required Tree Report shall include the location, size, type, and condition of all existing trees in the adjacent public right-of-way and shall be submitted for review and approval by the Urban Forestry Division of the Bureau of Street Services, Department of Public Works (213-847-3077). The plan shall contain measures recommended by the tree expert for the preservation of as many trees as possible. All replacement trees in the public right-of-way shall be provided per the current Urban Forestry Division standards.

CULTURAL RESOURCES

No mitigation measures are required.

GEOLOGY AND SOILS

GEO-1 Grading (20,000 Cubic Yards, or 60,000 Square Feet of Surface Area or Greater)

- The project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.

GEO-2 Erosion/Grading/Short-Term Construction Impacts

- Chapter IX, Division 70 of the Los Angeles Municipal Code addresses grading, excavations, and fills. All grading activities require grading permits from the Department of Building and Safety. Additional provisions are required for grading activities within Hillside areas. The application of BMPs includes but is not limited to the following mitigation measures:
- A deputy grading inspector shall be on-site during grading operations, at the owner's expense, to verify compliance with these conditions. The deputy inspector shall report weekly to the Department of Building and Safety (LADBS); however, they shall immediately notify LADBS if any conditions are violated.

- “Silt fencing” supported by hay bales and/or sand bags shall be installed based upon the final evaluation and approval of the deputy inspector to minimize water and/or soil from going through the chain link fencing potentially resulting in silt washing off-site and creating mud accumulation impacts.
- “Orange fencing” shall not be permitted as a protective barrier from the secondary impacts normally associated with grading activities.
- Movement and removal of approved fencing shall not occur without prior approval by LADBS.

GREENHOUSE GAS EMISSIONS

- GHG-1** Low- and non-VOC containing paints, sealants, adhesives, solvents, asphalt primer, and architectural coatings (where used), or pre-fabricated architectural panels shall be used in the construction of the Project to reduce VOC emissions to the maximum extent practicable.
- GHG-2** Any new construction shall include 20 percent of parking spaces set aside for EV ready parking.

HAZARDS AND HAZARDOUS MATERIALS**HAZ-1 Hazardous Materials Site**

- Prior to the issuance of any use of land, grading, or building permit, the applicant shall obtain a sign-off from the Fire Department indicating that all on-site hazardous materials, including contamination of the soil and groundwater, have been suitably remediated, or that the proposed project will not impede proposed or on-going remediation measures.

HAZ-2 Emergency Evacuation Plan (Building over 75 feet in height)

- Prior to the issuance of a building permit, the applicant shall develop an emergency response plan in consultation with the Fire Department. The emergency response plan shall include but not be limited to the following: mapping of emergency exits, evacuation routes for vehicles and pedestrians, location of nearest hospitals, and fire departments.

HYDROLOGY AND WATER QUALITY

No mitigation measures are required.

LAND USE AND PLANNING

No mitigation measures are required.

MINERAL RESOURCES

No mitigation measures are required.

NOISE**Increased Noise Levels (Demolition, Grading, and Construction Activities)**

- N-1** Construction and demolition shall be restricted to the hours of 7:00 am to 6:00 pm Monday through Friday, and 8:00 am to 6:00 pm on Saturday.
- N-2** To the maximum extent practical, demolition and construction activities shall be scheduled so as to avoid operating several pieces of equipment simultaneously, which causes high noise levels.
- N-3** The project contractor shall use power construction equipment with state-of-the-art noise shielding and muffling devices.
- N-4** An acoustical sound blanket shall be erected along the Project Site's northerly property line to absorb construction noise levels generated by earthmoving equipment and foundation construction.
- N-5** An information sign shall be posted at the entrance to each construction site that identifies the permitted construction hours and provides a telephone number to call and receive information about the construction project or to report complaints regarding excessive noise levels. Any reasonable complaints shall be rectified within 24 hours of their receipt.
- N-6** The Applicant shall provide a courtesy notice of the project's construction related activities to adjacent business owners a minimum of two weeks prior to commencement of construction.

POPULATION AND HOUSING

No Mitigation Measures are required.

PUBLIC SERVICES

No Mitigation Measures are required.

RECREATION

No Mitigation Measures are required.

TRANSPORTATION AND TRAFFIC**Increase Vehicle Trips/Congestion**

- TRAFFIC-1** Implementing measure(s) detailed in DOT's communication to the Planning Department (DOT Case No. CEN 15-43958 dated January 6, 2016, See Appendix G to this MND) shall

be complied with. Such report and mitigation measure(s) are incorporated herein by reference.

TRAFFIC-2 A Construction work site traffic control plan shall be submitted to DOT for review and approval in accordance with the LAMC prior to the start of any construction work. The plans shall show the location of any roadway or sidewalk closures, traffic detours, haul routes, hours of operation, protective devices, warning signs and access to abutting properties. All construction related traffic shall be restricted to off-peak hours.

TRAFFIC-3 All delivery truck loading and unloading shall take place on site or within the boundaries of an approved traffic control plan and the alley.

TRAFFIC-4 The developer shall install appropriate traffic signs around the site to ensure pedestrian and vehicle safety.

The applicant shall be limited to no more than two trucks at any given time within the site's staging area.

There shall be no staging of hauling trucks on any streets adjacent to the project, unless specifically approved as a condition of an approved haul route.

No hauling shall be done before 9 a.m. or after 3 p.m.

Trucks shall be spaced so as to discourage a convoy effect.

On substandard hillside streets, only one hauling truck shall be allowed on the street at any time.

A minimum of two flag persons are required. One flag person is required at the entrance to the project site and one flag person at the next intersection along the haul route.

Truck crossing signs are required within 300 feet of the exit of the project site in each direction.

The owner or contractor shall keep the construction area sufficiently dampened to control dust caused by grading and hauling, and at all times shall provide reasonable control of dust caused by wind.

Loads shall be secured by trimming and watering or may be covered to prevent the spilling or blowing of the earth material.

Trucks and loads are to be cleaned at the export site to prevent blowing dirt and spilling of loose earth.

No person shall perform grading within areas designated "hillside" unless a copy of the permit is in the possession of a responsible person and available at the site for display upon request.

A log documenting the dates of hauling and the number of trips (i.e. trucks) per day shall be available on the job site at all times.

The applicant shall identify a construction manager and provide a telephone number for any inquiries or complaints from residents regarding construction activities. The telephone number shall be posted at the site readily visible to any interested party during site preparation, grading and construction.

TRAFFIC-5 The Applicant shall plan construction and construction staging as to maintain pedestrian access on adjacent sidewalks throughout all construction phases. This requires the Applicant to maintain adequate and safe pedestrian protection, including physical separation (including utilization of barriers such as k-rails or scaffolding, etc.) from work space and vehicular traffic and overhead protection, due to sidewalk closure or blockage, at all times.

Temporary pedestrian facilities shall be adjacent to the project site and provide safe, accessible routes that replicate as nearly as practical the most desirable characteristics of the existing facility.

Covered walkways shall be provided where pedestrians are exposed to potential injury from falling objects.

The Applicant shall keep sidewalk open during construction until only when it is absolutely required to close or block sidewalk for construction staging. Sidewalk shall be reopened as soon as reasonably feasible taking construction and construction staging into account.

UTILITIES AND SERVICE SYSTEMS

No Mitigation Measures are required.

MANDATORY FINDINGS OF SIGNIFICANCE

See Mitigation Measures above.
