Comments for Public Posting: I write to urge support for approving HHH funding on these 3 innovation project proposals. These housing opportunities are critically needed in every corner of the City in order to stem the flow of permanent homelessness. What's more, these innovation challenge proposals have found ways to bring overall costs per unit down and serve as a viable model for scaling up permanent supportive housing solutions in future scenarios. The pandemic has created a new set of challenges for housing stability across the City, and it is imperative that our City leaders are exhausting all available options for the creation of truly affordable and permanent housing solutions. Please vote Yes.
