**Comments for Public Posting:** As this vote comes up for placing homeless in hotels, I want to make it clear that the pandemic already brought this kind of problem to El Segundo and we saw how the outcome worked out. This would be placing our staff and neighbors in a dangerous and questionable situation. We already had many people which became homeless due to the pandemic and having them stay with us at our properties was not a good thing then and would be detrimental to the area. I hope you will consider the outcome on El Segundo itself if not all of the hotels around the safety of the staff.
