**Comments for Public Posting:** Dear PLUM Committee Members, THE LA GREENS, urge you to readopt the oil phaseout ordinance which will be heard at the June 9th PLUM Committee meeting. This ordinance is an incredibly important step in the process towards a full phaseout of oil drilling citywide. No MORE LEAKS, SPILLS, or POISONED NEIGHBORHOODS. We must Tax Big and Small Oil Companies and use the funds for clean energy and frontline community reparations. Make amendments to the ordinance to fast track refinery shut downs with worker-led just transition programs. No more handouts to the industry destroying our climate. Replace private utilities with public, community controlled energy. We demand Green Jobs! Create 50,000 union jobs, retrofitting homes, installing renewables and upgrading the grid.
