Council File No: 17-0447

Comments for Public Posting: At a time when our petrochemical resources are under attack by the federal and state government it is imperative that the city council take a stand against these anti-economic, anti-American and anti-environmental proposals. LA sits on a sea of oil. If not extracted and put to good use -and not just gasoline & diesel fuel production- in the production of a myriad of products from plastics to fertilizers and many more irreparable damages will be done to our economy.
