

MOTION

Whenever a new development project is moving forward in the City of Los Angeles, the Department of Transportation (LADOT) provides services at the planning and entitlements stage of developments, followed by plan reviews and permitting once construction begins.

In light of the recent surge in development occurring in the City, LADOT has identified a need for additional staff resources, supported by development fees, in order to better support the development industry. The requested positions will be dedicated to providing timely reviews of traffic studies and plan processing, in addition to offering new services to developers at the LADOT construction permit counter at Figueroa Plaza. In 2017, the General Fund collected \$1.8 million in developer fees, in addition to plan review reimbursement fees through the B-Permit process, which can be used to support the new activities at LADOT.

I THEREFORE MOVE that the City Council, subject to the approval of the Mayor, approve resolution authority in the 2017-18 fiscal year for the following positions at the Department of Transportation for Transportation Planning & Land Use Review and Design & Plan Review:

- 1 Supervising Transportation Planner I
- 1 Transportation Planning Associate II
- 1 Transportation Engineer
- 4 Transportation Engineering Associate IIIs

Presented by:

PAUL KREKORIAN
Councilmember, 2nd District
