Council File No: 18-0054

Comments for Public Posting: I'm writing to strongly encourage the B&F Committee and City Council to make sure that there is adequate funding for the Climate Emergency Mobilization Office & Commission for the next fiscal year, equal to or greater than the sum initially approved for this year. The CEMO is a necessary office that will help ensure that the most vulnerable communities are able to prevent the worst of climate change and adapt to the projected realities. Proper planning and investment in climate change mitigation and adaptation often end up saving large sums of money down the line, and I would encourage city council to consider this reality as they weigh the budget going forward. If this year has taught us anything, it's that an ounce of prevention is worth a pound of cure, and that we MUST listen to experts in order to prevent future harm. Thank you.
