Comments for Public Posting: Save Frontline Communities! Keep Climate Emergency Mobilization Office! CEMO and Chief Heat Officer Segura are on the precipice of receiving a grant award from the California Governor's Office of Land Use and Climate Innovation for the development of a Blueprint, Extreme Heat Plan. This would make LA the first City in California to prepare a Heat Action Plan that could be shared with other cities in peer to peer sessions established by the Governor's Office. LA would secure a coveted leadership role leading on Extreme Heat Mitigation and Infrastructure solutions. This award would leverage additional Extreme Heat funding from the State and the Governor's Office and also raise LA's profile as a city ready to receive more Climate Bond dollars. The international community will be looking to see exactly what we are doing over the next four years to address climate change. In a year where we have seen a catastrophic climate event, eliminating this office is a step in the wrong direction.
