**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** Please tell LA City Council why you support appealing this approval. You can copy and paste the following, or explain in your own words:

Dear City Council Members,

I am a Citizen for Los Angeles Wildlife and I oppose the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees.

This decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian habitat. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

I live at Chesebro Canyon, soon to be home of the largest wildlife crossing in the world. I am on the board of the Old Agoura Homeowners Association. The #1 priority of our membership when polled is open space!!!! There is so little left in LA. Please protect what we have. Sincerely, Chris Nitz

For decades I've watched the springs and creeks from those springs vanish -- usually under cement -- and with them one of nature's most delightful and generative sources, nourishing native flora and fauna. Please help preserve what's left, instead of bowing to development pressure which might generate a few more tax dollars, but remove so much of what's really valuable.

**Zip Code:** [90068](#)

**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** Dear City Council Members,

I am a Citizen of Los Angeles for many years. I am an advocate for Los Angeles Wildlife. I oppose the Board of Public Works (BPW) adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees.

This BPW decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian habitat. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

Los Angeles needs to protect its wildlife, and hence wildlife habitats, including those rare riparian habitats, open spaces and wildlife corridors. As these areas become increasingly rare it is paramount that those remaining receive a fair and informed review and evaluation prior to any permit approval to modify these lands and their fauna and flora.

Sincere,  
Margaret George

**Message:** Los Angeles is a livable city because development has not destroyed all wildness areas. We need our wildlife to retain some perspective and for moral reasons. Do not allow development to take another area.

I awake every morning with dread. Another natural area lost; still so few public parks; more wildlife killed while crossing roads and freeways or from poisons used by man. When will we accept our responsibilities to other living things?

Marilouise Morgan

Respectfully submitted,  
Marilouise Morgan

**Message:** I oppose the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees. This decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian creek habitat, as well as the connectivity this land provides between two large open space areas.

Protecting open space land in the SM Mountains is critical for a flourishing and healthy Los Angeles. An MND is not adequate to examine the significant impact to this land, land which is part of a wildlife corridor between two large open space habitat areas.

The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard the appeal from CLAW. Thank you for hearing the concerns of the community.

**Message:** Dear City Council Members,

I oppose the Board of Public Works adoption of ENV-2015-1843-MND and support the appeal of Citizens for Los Angeles Wildlife. I have lived in Los Angeles all my life. Sadly I have watched our mountains and wildlife corridors slowly being decimated by over development. I was a Commissioner for the West Los Angeles Area Planning Commission for over eleven years, and I'm painfully aware of the pressures to build large homes in our precious natural habitat. Tree removal of five protected trees is unacceptable in such a needed habitat. The damage to an important wildlife corridor is irreparable and totally unnecessary. Please support the appeal of Citizens for Los Angeles Wildlife which I am a member.

Thank you for your consideration.

**Message:** I am a longtime resident of Nichols Canyon, and am deeply dismayed by the number of oversized developments being built in the Canyon and surrounding areas. While I understand that these "mega-mansions" for the

most part follow existing legal guidelines, the LA City Council needs to recognize that there are larger concerns that affect the well-being of the entire city, not just high-priced hillside neighborhoods. If we don't preserve the existing habitat in the Hollywood Hills, all residents of Los Angeles will suffer. The house proposed to be built at [2251 Nichols Canyon](#) will greatly and negatively impact the wildlife habitat in the area. Thank you for your time and consideration.

**Message:** Dear Los Angeles City Planners,

Please understand that Los Angeles has the worst air quality of any city in the country. If overdevelopment in the Santa Monica mountains continues, we will soon rival cities like Beijing and Mexico City for worst air quality. Protected trees be protected, not ignored! Trees keep our air clean. A viable wildlife population ensures a healthy environment for our citizens. Traffic, construction vehicles, leaf blowers, all of these contribute to our worsening air pollution. We are being warned of power outages in the summer. Our infrastructure does not support constant growth. Our open spaces and wild land help keep our air clean and our environment cool and our city livable. PLEASE think of future generations. The Santa Monica Mountains are a blessing to our city and the well-being of our residents. They should NOT be a resource for real estate investors. If we do not protect what is left of the natural environment, we will have failed in our stewardship of a precious legacy, unique to our city. Do not turn your backs on what was here before we came in favor of profit-making schemes. We beg you to become more enlightened!

As cities expand, taking up more and more of the earth's land and resources, we city dwellers must do all in our power to protect the land and wildlife within our boundaries and to recognize our role in fighting climate change. Ecological loss is a matter of urgency! To pay lip service while acting irresponsibly is unacceptable. Future generations are depending on us.

**Message:** Dear City Council Members,  
I have been a life long citizen of Los Angeles for over 60 years. The gross mansionization of our hillsides is offensive to both nature and good taste. No one single residence actually NEEDS 8000 sq ft, it's despicable excess and greed at immense cost to everything and everyone around it. The City has numerous building codes and Hillside Ordinances, yet they never miss an opportunity to bypass their own rules in favor of acquiring more tax revenue.

Damaging precious resources damages US. The City and its greed cannot look 5 steps ahead to SEE this. Natural water lines are a lifeline to native life, and will be a critical lifeline to humans in event of any disaster, whether man made or natural. Too bad the need for ever more tax dollars overrides common sense.

Most sincerely,  
Patricia Vetter

**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** Please tell LA City Council why you support appealing this approval. You can copy and paste the following, or explain in your own words: Dear City Council Members, I am a Citizen for Los Angeles Wildlife and I oppose the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees. This decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian habitat. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** It is essential that the City's environmental review take into account all of the potential impacts of projects proposed in environmentally sensitive areas such as the one where this proposed project is located. The City's acceptance of a Mitigated Negative Declaration has failed to take into adequate consideration the adverse effects that this proposed project would have on the fragile onsite riparian habitat. The Mitigated Negative Declaration also failed to take into account the potential adverse impacts on habitat connectivity -- essential to supporting the wildlife that lives in the large open space habitat areas nearby. Proposed construction in areas key to wildlife connectivity and the maintenance of a viable ecosystem must be evaluated via a full environmental impact assessment/report.

It has further been reported that a Tree Removal Permit has been granted for the property-- PRIOR to the pending appeal before Council has been heard. No action on this project should take place until after all appeal and legal remedies have been exhausted.

Thank you for your consideration.

**Message:** Dear City Council Members,

I am a Citizen for Los Angeles Wildlife member and I strongly oppose the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees. What is the point of having a Protected Tree Ordinance when a removal permit for 5 - 5! - trees is so easily granted?

This decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian habitat. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

Please take the time to walk this beautiful sycamore-lined canyon for yourselves. It is as beautiful for us as it is essential for the wildlife who call it home.

**Message:** Dear City Council Members,

Please wake up to the fact that citizens need open spaces to thrive. Our planet needs green space, our trees have a right to stay where they are, protecting from flooding, making oxygen for us to breathe. Please reconsider this approval of the 8,000 square foot space.
