## Protect Wildlife Corridors in LA!

In 2018, the Los Angeles Board of Public Works approved an 8,000+ sq. ft. single family home to be constructed over a creek in Nichols Canyon. This approval, which includes the removal of five protected trees, failed to adequately address the environmental impact the development would have on the creek habitat, as well as the connectivity this land provides between two large open space areas.

Deer near the project site.

CLAW is appealing this approval to ensure that full environmental review is given to this project. Please use the form below to add your voice to this appeal, and let our city know that the public is making sure LA's ecology is not being ignored as we continue to grow. Your message will be added to the Council File for this project.

Your form has encountered a problem. Please scroll down to review.

Please tell LA City Council why you support appealing this approval. You can copy and paste the following, or explain in your own words:

Dear City Council Members,

I am a Citizen for Los Angeles Wildlife and I oppose the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees.

This decision failed to take in adequate consideration of the adverse effects this project would have on the onsite riparian habitat. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

Your form has encountered a problem. Please scroll up to review.

**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** I oppose the adoption of ENV-2015-1843-MND and its addendum by the Board of Public Works. I also oppose the approval of a tree removal permit for five protected trees.

The decision failed to consider the potential adverse effects on the onsite riparian habitat. The MND also did not address potential adverse effects on habitat connectivity. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard our appeal.

**Subject: Council File: 18-0278 - Full Environmental Review is Needed:**

**Message:** Dear City Council Members,

As a Los Angeles resident, I ask you to reconsider the Board of Public Works adoption of ENV-2015-1843-MND and its addendum, as well as their approval of a tree removal permit for 5 protected trees.

The Board clearly did not factor in the damage this project would do to the onsite and surrounding ecology. The MND also did not address potentially adverse effects on habitat connectivity, as this land is acting as a wildlife corridor between two large open space habitat areas. The Tree Removal Permit for this project was granted prematurely, and no tree removal should take place before the City Council has heard an appeal.
