Dear Mr. Lid

We are fighting to avoid cruelty in all the world, we can explain it from countries of the 3rd. world, but in the US? we are the lider of the world with examples of a daily human growing, we are supposed to use the brain and the knowledge to know that we don't need fur from innocent animals to cover our bodies and go with the fad, so please help us stop this terrible practice that make us be as savage as other countries that are still rasing from nearthenthals.

We know about your concern and great human quality, so we are sure, our next message to you will be to congratulate for your cointinuous assets in your honorably career.

With best regards,

Brianda M. Puig
