RE: CEQA Appeal of Board of Public Works adoption of Environmental Determination for Tree Removal Permit Issued for: 11580 Sunshine Terrace, 91604. Pursuant of Public Resources Code Section 21151©; ENV-2016-3230-MND Council File #18-0620

Dear Honorable Members of the Los Angeles City Council,

I would like to request that as Honorable Members of the Los Angeles City Council to critically review and work to re-evaluate the approval that was given to remove the protected trees on the lot of 11580 Sunshine Terrace. The trees include nine Coast Live Oak (*Quercus agrifolia*) as well as one Southern California Black Walnut (*Juglans californica*). The reason that I purchased my home 12 years ago in this area of Los Angeles was that I understood that the City of LA and the local government was environmentally conscience and took seriously the guidance on protection of trees and the lands in and around the area of Sunshine Terrace in Studio City. The pollution index is tremendously high in our city and unhealthy. Our trees are important and critical to support healthier and cleaner air as well as in helping to protect the animals, birds and insects that serve to support our environment.

There has been much discussion and a plan has been proposed that will serve to save some or most of the oak trees and to allow for a home to be built on the lot of land that will support and fit the needs of the owners of the property at 11580 Sunshine Terrace.

Thank you for your attention to this matter.

Sincerely,

Belinda H. Jenks, PhD
Home Owner
